ALL MISSIONS SYSTEM

5.11's new All Mission System provides a robust and rugged platform, designed to help you achieve your mission goals.

All of our All Missions products are compatible with 5.11's HEXGRID® Gear Set™ attachment which gives multi-directional mounting capabilities of web/MOLLE pouches, as well as hook and loop attachments. This allows for your pack, bags and plate carrier capabilities to be expanded and mission-prepped with Gear Sets that can be easily switched or transferred between bags and mounted externally and/or internally.

SIZE CHARTS

Using a measuring tape, measure your body (not over clothing). If you fall between sizes, order the smaller size for a tighter fit or the larger size for a looser fit.

Men: Use your chest, arm length and neck measurements to determine the proper size for tops and outerwear; use your waist measurement (where you wear your pants) for bottoms and belts.

Women: Use your chest measurement to determine the proper size for tops and outerwear; use your waist (smallest point) and hip measurements for bottoms; use your waist measurement (where you wear your pants) for belts.

HOW TO MEASURE YOUR BODY

Chest: Measure under arms and around the fullest part of your chest with measuring tape parallel to the floor.

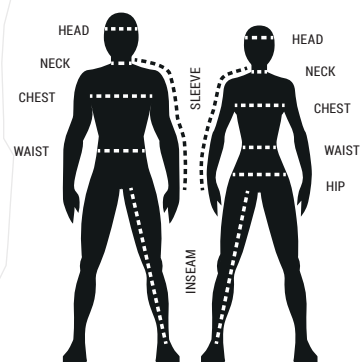

Waist: Measure around the natural part of your waist (Men - where you wear your pants/Women - smallest part of your waist).

Neck: Measure around the base of your neck.

Hip: Stand with your feet together and measure around the fullest part of your hip with the measuring tape parallel to the floor.

Arm Length: Slightly bend elbow and measure from centre back neck, over top of shoulder and down to wrist.

Inseam: Measure inside of leg from crotch to ankle or desired length.
