**FEED  
YOUR  
FIREARM™**

Your guns are hungry. They crave lead and feast on recoil. They are born with a gluttonous appetite for speed and accuracy. We are Aguila Ammunition. We believe that getting the most out of your firearm begins with what you put into your firearm. And that's why we only source the best raw materials to manufacture the best ammunition possible. Ammunition that's reliable and dependable shot after shot. Ammunition that holds nothing back when it comes to performance, quality, and innovation. Yes, ammunition that your guns will downright devour. Let the feeding frenzy begin.

RELIABILITY. ACCURACY. PERFORMANCE.

# RIMFIRE

Our rimfire ammunition is manufactured to ensure optimal reliability, accuracy, and performance. It features Aguila Prime technology, which is engineered and tested to Olympic shooting standards.

## RIMFIRE TECHNICAL SPECIFICATIONS

Named for the process of packing the priming compound into the rim of the cartridge, rimfire rounds are limited to lower pressures and lighter weights — making them an inexpensive and easily accessible round. Manufactured using Aguila Prime technology, which is engineered and tested to Olympic shooting standards, Aguila's rimfire cartridges are meticulously formed for performance and perfection. Clean combustible powders, maximum output at controlled pressures, and a strict quality assurance program all add up to give shooters the Aguila Advantage.

RIMFIRE / STANDARD

22 SUPER EXTRA / SHORT HIGH VELOCITY COPPER-PLATED SOLID POINT*						STANDARD	
						NO. 1B222110	
	<p><b>PERFORMANCE AND AFFORDABILITY GO HAND IN HAND.</b> Our short high velocity ammunition produces tight groups and has plenty of knockdown power for rodents, all while being our most affordable rimfire. It's recommended for use in bolt-action rifles.</p>

22 SNIPER SUBSONIC / LONG RIFLE SUBSONIC LEAD SOLID POINT\*

PERFORMANCE

NO. 1B222112

**FOR WHEN ACCURACY MATTERS MOST.** Featuring a 60-grain lead bullet on a short case, our Sniper Subsonic has the same overall dimensions and energy equivalent to a standard 22 long rifle round. The bullet travels at subsonic speeds for quiet shooting and is recommended for use in bolt-action rifles and designed for 20" barrels or longer.

22 COLIBRÍ / LONG RIFLE SUBSONIC POWDERLESS LEAD BULLET\*

PERFORMANCE

NO. 1B222337

**SILENCE IS DEADLY.** Perfect for hunting and target shooting at close range, this specialized powderless round is ultra-quiet and eliminates the trouble and investment of using a suppressor. It's great for young shooters, thanks to its lack of recoil. Designed for bolt-action or revolver platforms.

# CENTERFIRE

From the standard to the unique, these high-quality rounds consistently hit dead center and cycle flawlessly — giving shooters the Aguila Advantage.

## CENTERFIRE TECHNICAL SPECIFICATIONS

By definition, centerfire rounds have a primer located in the center of the cartridge case head that is a separate, replaceable component. Edward M. Boxer is credited with modern primer designs with origins dating as far back as 1866. At Aguila “Non-Corr Priming” is used and guarantees reliable ignition in any weather conditions, the Aguila Advantage will hit dead center. With a wide variety of calibers from the standard to the unique, Aguila offers high-quality rounds that cycle flawlessly with remarkable consistency in both velocity and accuracy.

# SHOTSHELL

Hunting and competition. Clays and home defense.  
410 bore to 12 gauge and everything in between. It's fair to say  
our extensive shotshell line has something for everyone.

## SHOTSHELL TECHNICAL SPECIFICATIONS

Fowling piece, scattergun, peppergun, shotgun: the naming choice for your pride and joy isn't important, but what goes in it is. The blunderbuss, arquebus, and musket all had their place in early shotgun history for their incredible close-range firepower and moving-target effectiveness, but were limited to rough shot and out-of-round steel being shot out of their 4 ½' to 5 ½' smooth bore barrels. Today's sophisticated offerings require a little more finesse. Enter Aguila shotgun shells. From high velocity buckshot to pigeon loads, from 16 gauge to the versatile Minishell®, the same strict performance standards, high-quality materials, and attention to detail used in the pistol cartridges are found under every crimp of every shell. Aguila shotgun shells are redefining the genre. Aguila's extensive shotshell line has something for everyone — whether the application is hunting, competition, clays, or home defense — from 410 to 12 gauge and everything in between.

SHOTSHELL / FIELD

12 GAUGE / HIGH VELOCITY / 1-1/4 OZ.\*

FIELD

AS THE SAYING GOES, SPEED KILLS. These high velocity shot loads are made from clean combustible powders for maximum output and minimum residue.

SHOT SIZE	LENGTH	LOAD		VELOCITY	PACKAGING		NO.
