NEW COVERT™ PRO SERIES

Go pinless. APEX™ GEAR is proud to continue to advance the most powerful and versatile single-pin sights on the market – still without the pin. COVERT™ PRO maintains all of the advantages of a long-range sliding sight, but with unique PWR•DOT™ Center•Dot LED technology. Tactile push-button brightness controls simplify use in the field, and a gear-drive elevation dial provides more control with smooth and precise adjustment. This year, the favorite COVERT™ PRO is now available with the new DOUBLE•DOT dual LED aperture. The red LED acts as a secondary pin when the green LED is set to 20 yards, or provides a point of aim for extreme distances beyond the range of the yardage tape.

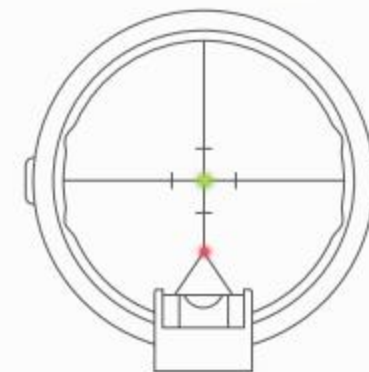

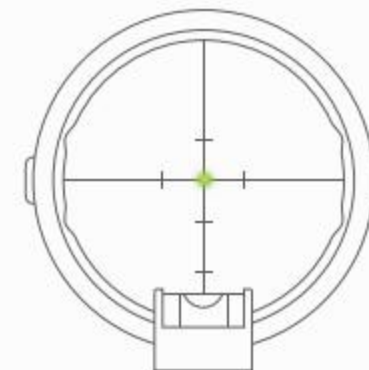

NEW FOR 2018

The COVERT™ PRO DOUBLE•DOT Reticle (AG2302GB) provides an additional red LED reference point that can be used for extreme long-range (shooting beyond the calibrated tape) or approximating holdover without dialing. When the green dot is dialed to 20 yards, the red dot will be near 50 yards on most modern bows.

- > Ultra-smooth easy one-hand adjustments. Includes over 120 pre-marked yardage tapes to simplify setup.
- > GRAVITY-LINE™ rotational adjustment aligns pin movement with gravity.
- > Rear-facing, easy-to-see yardage tape location.
- > Tactile push-button brightness control.
- > Perfect for any light condition.
- > Adjustable 2nd and 3rd axis.
- > Quick and easy setup.
- > Improved adjustable yardage pointer and end-of-travel elevation stop.
- > Adjustable for left and right-handed users.
- > Approximately 700-hour battery life.
- > Automatically turns off after 4 hours without adjustment.
- > Patented.

ATTITUDE™ SERIES

With five .019" PRO•BRITE™ pins, micro-adjustable windage and elevation, and GRAVITY-LINE™ rotational adjustment, ATTITUDE™ is the new standard in performance hunting sights. The available multi-position detachable bracket and the OPTI•CHOICE™ II Pin Selector System provide archers with amazing control and versatility – simplifying the sight picture and preserving low-light vision by only illuminating the pin that you need.

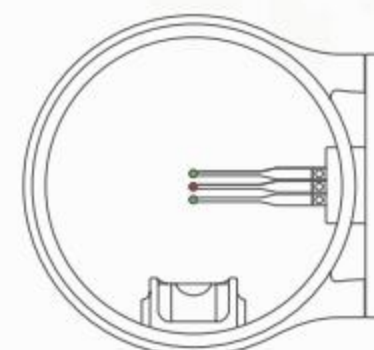

OPTI-CHOICE II PIN SELECTOR (AG4815BKS MODEL ONLY)

1. Rotate to select which pin to illuminate. (Any individual pin, or all pins at once)
2. Push for multiple brightness settings. (Low, Medium, High, Off)
3. Brightness / selection indicator for selected pin or all pins.

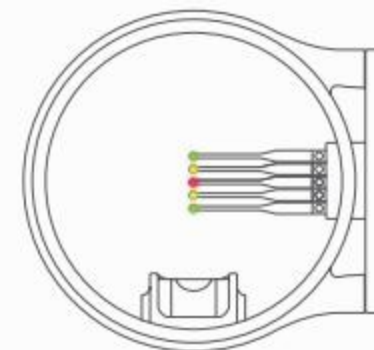

- > GRAVITY-LINE™ rotational adjustment aligns pin movement with gravity.
- > Level is illuminated with luminescent tape.
- > Reversible bracket for greater vertical adjustability.
- > Markings for elevation and pin adjustments.

- > Adjustable for left and right-handed users.
- > Model AG4815BKD comes equipped with a detachable bracket allowing for greater adjustability.
- > Model AG4815BKS comes equipped with the OPTI-CHOICE™ II Pin Selector System.

STABILIZERS

Balance is everything. A bow that is properly balanced and stabilized is indispensable to the successful archer. Add in vibration dampening features and your hunting bow turns into a high-efficiency masterpiece.

EST. 2007

NEW END•GAME™ STABILIZER

To give hunters the edge they need, END•GAME™ utilizes high-quality materials to bring the center of gravity farther forward where it is more effective. A strong and light carbon-fiber tube supports an adjustable end-weight system, allowing archers to tune the weight to match their bow. Included colored dampening rings provide a custom look while absorbing noise and vibration.

Customize appearance with colored dampening rings.

AG815B

- > Improves bow balance for better accuracy.
- > Lightweight carbon-fiber tube moves the center of gravity forward.
- > Adjustable weight system (6, 7, or 8oz. total weight) tunes your bow.
- > Engineered for performance hunting bows.
- > Dampening rings between weights absorb noise and vibration.
- > Seven different colored dampening rings included for a custom look.
- > Fits all bows.

SPECIAL FEATURE:

Lightweight carbon-fiber tube moves the center of gravity forward.

COVERT™ STABILIZER

The COVERT™ family of products represents the state-of-the art in performance archery gear – helping you maintain stealth and accuracy to improve your effectiveness in the woods. The COVERT stabilizer is machined from tough aircraft grade aluminum to thrive in harsh environments, while the RumbleBuster™ System reduces vibration in your bow and dampens your noise signature when it is time to take the shot.

- > Aircraft grade aluminum exoskeleton.
- > RumbleBuster™ symmetrically tuned noise / vibration dampening disc.
- > Includes optional Picatinny rail for mounting accessories.
- > Engineered for performance hunting bows.
- > Length: 7 in.
- > Weight: 6.5 oz. (with rail installed).

ARROW RESTS

A well-tuned arrow rest is the heart of an accurate and effective hunting bow. Whether you prefer a drop-away or capture-style design, our arrow rest provide the support and precision you need.

Est. 2007

NEW COVERT™ ARROW REST

The advantages of a performance arrow rest make an astounding difference for hunters counting on accuracy, stealth, and hard-hitting effectiveness. The COVERT™ High-Speed Click-Up Arrow Rest brings unique Hammer Release Technology™ into the world of drop-away rests, supporting the arrow longer for increased accuracy.

AG745B

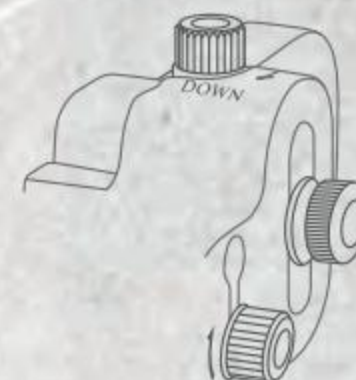

- > Full-capture, click-up and drop-away design.
- > Draw or use thumb lever to raise launcher. Launcher stays up until fired or lowered with thumb lever.
- > No launcher movement during draw cycle with Hammer Release Technology.
- > Delayed Drop—supports arrow longer than other drop-away rests for superior accuracy, then drops rapidly.
- > Maximum vane clearance.
- > Ergonomic thumb actuation.
- > Five replaceable colored SILENT DRAW inserts included.
- > Cushioned adjustable down stop.
- > Independent windage and elevation adjustments.
- > Down cable actuated, cable clamp included.
- > Fully-assembled, mounting hardware included.
- > Easy to install / fits with all bows.
- > Patent Pending.

Customize appearance with colored inserts.

NEW FOR 2018

The COVERT Arrow Rest is now available in a precision MICRO-ADJUSTABLE model (AG745B / AG745BLH). Each full rotation of the adjustment screw moves the launcher .025" to make paper-tuning quick and precise.

All 2018 COVERT Arrow Rest models utilize a self-lubricating coating on the hammer release system to provide slick and consistent operation in even the nastiest and coldest of hunting conditions.

ATTITUDE™ ARROW REST

- > Full containment, drop-away arrow rest.
- > High-speed stainless steel launcher arm.
- > Lightweight all-metal construction.
- > Maximum vane clearance.
- > Attaches to downward moving buss cable.
