LEGENDS

For more than 80 years, Bear Archery is proud to continue what our creator started. A devoted archer, outdoorsman, and conservationist, Fred Bear believed in making archery accessible to all people without sacrificing quality. Today, our products are still built by the hands Fred instructed. For the moments you need to cleanse your soul and put a few miles between you and the rest of the world, Bear Archery is there.

THE FRED BEAR WAY

Nature can be cruel. Her ways are tooth and claw, starvation and exposure. The hunter is never cruel, and his way delivers a far better end.

- Fred Bear

WE SOLEMNLY SWEAR

Each Bear bow, no matter how large or small, will be utterly reliable and intensely lethal, capable of harvesting game quickly and ethically. This promise will never change. It's been our benchmark for more than 80 years, and the guiding principle behind the creation, perfection, and constant refinement of methods and techniques known only within Bear. No other bow feels, functions, or finishes like a Bear. Nothing fulfills your highest expectations in quite the same way.

"I've been bowhunting professionally for over 30 years and I have filled more tags than ever since switching back to Bear Archery eight years ago! The confidence that I have in my equipment absolutely makes ALL the difference in the world . . . and there's no doubt my Bear bow is going to perform flawlessly for me when it matters!"

- David Blanton

"I always choose Bear, no matter what the hunt! Bear bows are fast, quiet and smooth, but their best quality is being extremely DEPENDABLE in every situation!"

- Jeff Danker

ULTIMATE SHOT

"With my Bear bow I shoot better today than I have ever shot before. With more than 100 World Records and 200 Top 5 Trophy Species from 6 continents, I need performance - my Bear bow speaks for itself!"

- Archie Nesbitt

 **RAISED**
HUNTING

"As a family we spend hundreds of hours in the field. As hunters we shoot thousands of arrows on the range. In the woods we make countless choices, but when it comes to our equipment we only choose the best, that's why we choose Bear."

- The Holder's

THE FRED BEAR WAY

Hunting is a return to man's natural life: seeking, outwitting and vanquishing a creature larger, stronger and better adapted than himself. There is no greater victory.

Fred Bear

TECHNOLOGY MEETS TRADITION

We strive to bring the most dependable and reliable bows to market that will instill confidence. Bear Archery meticulously manufactures and assembles every component to ensure your success when that moment of truth presents itself.

LOCK DOWN POCKET SYSTEM A system that incorporates four components which provides the most accurate riser-to-pocket-to-limb alignment in the industry.

- **Limb Boot** Captures and insulates the limb butt eliminating noise, shock, and vibration.
- **Patent Pending Half Round** When placed under load the patent pending half round clamps the limb and allows zero movement.
- **Lock Down Washer** Precisely aligns the front side of the pocket to the riser.
- **Tangs** Secures the pocket to the riser throughout the entire draw weight change.

ROLLER HINGEGUARD An advancement to the HingeGuard™, the all-new Roller HingeGuard introduces roller bearings at key contact points, reducing friction.

VERSAGRIP™ Positive palm weld enables the VersaGrip to fit comfortably, yet provides a smaller profile for reduction in torque.

NAROGRIP™ Fitting your hand precisely, archers can repeatedly achieve consistent hand placement to ensure an accurate shot every time while reducing torque.

ROCKSTOPS™ Adjustable limb stops that form a solid back wall.

SONICSTOPS™ SonicStops are essential in eliminating string vibration and noise at the point of origination.

SONICBONDS™ Dampening integrated into risers and pockets eliminate noise at the source.

SHOCKWAVES Limb dampener device eliminates vibration and shock.

SPEED NOCKS Increases bow's performance and speed while reducing vibration.

BEARTRAP™ LIMB POCKET The BearTrap Limb Pocket combines the strength of our metal pocket with the integration of a zero-tolerance boot.

HINGEGUARD™ The HingeGuard consistently reduces lateral torque at all draw weights using mechanical displacement and adds forgiveness in the shot.

ENDURAFIBER™ LIMBS These limbs provide unmatched flexibility and rigidity and allow for maximum weight adjustability for a customized fit for any shooter. The unique shape of the limb creates a reliable load distribution.

SONICKNOTS™ String dampening that also provides incremental speed.

DRAWDIAL™ Rotating modules that adjust to each individual shooter without using a bow press.

DRAWDIAL EZ VIEW™ Rotating modules that offer maximum adjustability in draw length ranges and an EZ View for aligning individual settings.

MAX PRELOAD QUAD LIMBS™ Designed to evenly distribute load across the entire limb surface which optimizes the geometry for extremely efficient performance.

CROSSLACK™ LIMB POCKET The CrossLock Limb Pocket incorporates a multi-facet system that provides maximum strength at key points of stress during and after the release.

BEARCAGE Eliminates riser flex and reduces weight while maintaining structural integrity.

EXCLUSIVE PERFORMANCE FOR PREMIUM DEALERS

For the second year, Bear presents the Legend Series™, an exclusive dealer-only line of all-new compound bows that up the ante on performance. This 2018 lineup of bows includes four ultra-competitive models that can't be found anywhere else.

LEGEND SERIES

THE FRED BEAR WAY

Man is such a natural hunter that lacking the native tools of a predator he created his own. To oppose hunting is to resist nature itself.

- Fred Bear

/// NEW FOR 2018

KUMA

A DEADLY COMBINATION

The Kuma offers the best of both worlds bringing together speed and comfort. This hybrid cam bow launches arrows at 345 feet per second, and offers a smooth draw and a high-level of forgiveness. Featuring the Bear Cage machining technique, the rigid 1" thick forged riser has been strategically "hollowed out" to lighten the load – yet still prevents side to side flex increasing accuracy. The Kuma features sleeker, smaller, and lighter SonicStops™ dual string suppressors that eliminate noise and vibration.

SOLE INTENT

ONE COMPACT PUNCH

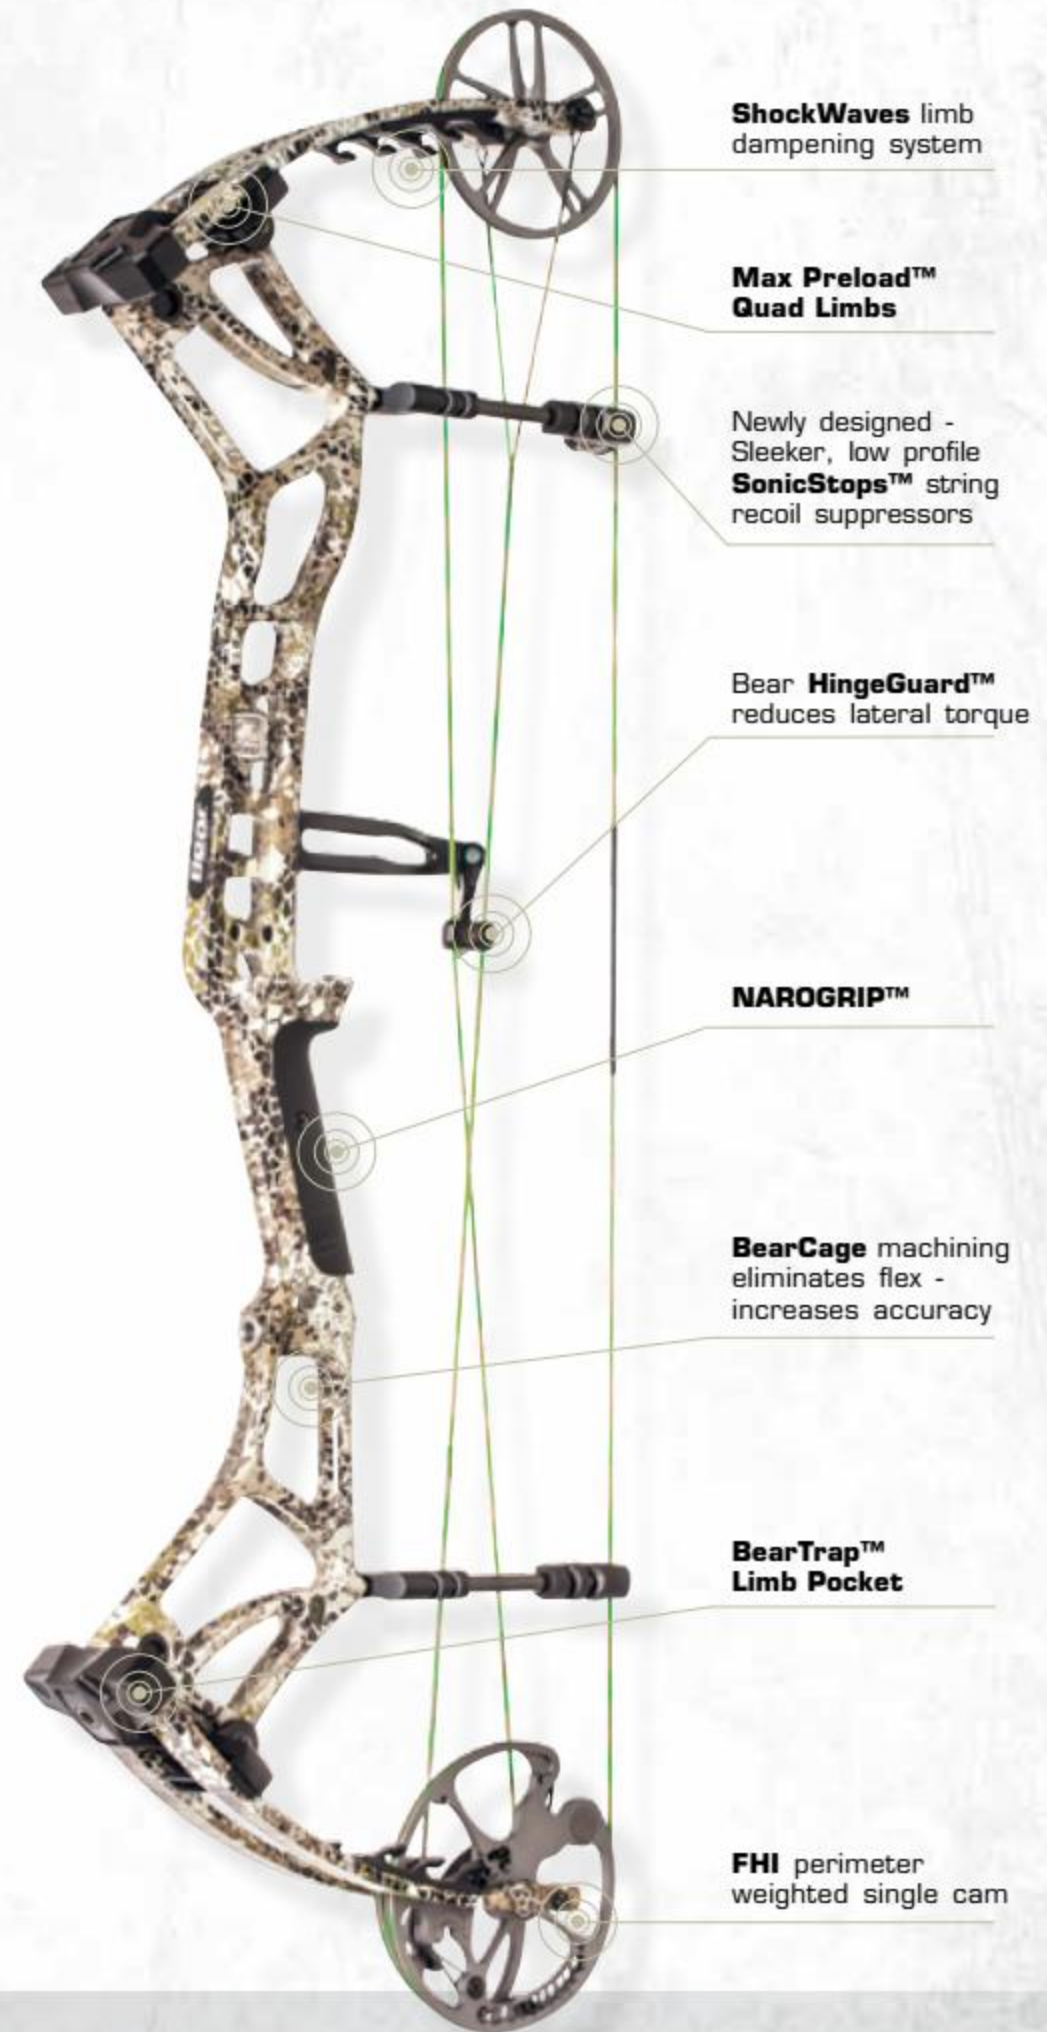

Forged for strength, machined for the accuracy, the Sole Intent features a single-cam system that requires less maintenance and is easier to set up and tune. With a smoother draw cycle and firing at 295 feet per second, the Sole Intent packs one compact punch at 29" axle-to-axle and a 45 to 60 lb. peak draw weight. Utilizing the BearCage Technology, the Sole Intent eliminates riser flex and reduces weight while maintaining its strength.

THE NEXT GENERATION

Bear Archery is proud to serve as the title sponsor for the Scholastic 3-D Archery Program, an afterschool initiative hosted by schools, churches, clubs, archery shops, and more which allows students to grow through archery and move into the college level. Students participating in S3DA events develop a lifelong passion for archery and bowhunting and learn the best practices in environmentalism and wildlife conservation.

LEGENDS LIVE ON

More than 80 years ago, a man named Fred Bear decided to follow his passion and start a bow-making company.

He was the ultimate sportsman, skilled and respectful of Mother Nature, and he sought to convey those attributes through the most innovative, satisfying, and effective bows ever made. Today, we are proud to continue what Mr. Bear started and our products are still built by hands he instructed. His spirit, vision, and craftsmanship have stood the test of time. So here's to you, Papa Bear. Thank you for setting an example for generations of shooters and for sharing the passion that's still with us today.

TRADITIONAL

EVERYTHING IS DIFFERENT AND NOTHING HAS CHANGED

Fred Bear went bowhunting for the first time.

Fred Bear and Charles Piper founded Bear Products Company.

Fred Bear shot his first deer with bow and arrow.

Fred Bear earns his third state archery championship win.

Fred Bear takes his first big game with bow and arrow - a Canadian Moose.

Fred Bear patents use of fiberglass as bow backing.

Bear Grizzly bow introduced.

THE FRED BEAR WAY

A tie to history, a reverence for nature, and respect for wild things form the soul of the bowhunter. Lacking these, he's just pulling strings.

- Fred Bear

1920s

1930s

1940s

Fred Bear developed special presses for bow bonding.

Fred Bear produced the first working recurve bows - Kodiak II.

Fred Bear took world record stone sheep in British Columbia.

Fred Bear took world record Kodiak bear in Alaska.

Bear Kodiak Magnum bow

Fred Bear took a Bengal tiger in India.

On his third African safari, Fred Bear took a lion and buffalo.

Bear Super Kodiak and Super Magnum 48 bows introduced.

"The Archer's Bible," first of Fred Bear's books published.

Bear Take Down bow introduced.

Bear Super Grizzly bow introduced.

1950s 1960s 1970s

FUTUREWOOD™

In the 1970s, Fred Bear introduced FutureWood, a manufacturing process that gives completely new physical properties to the wood in the handle section. Because of the high demand from customers, Bear reintroduced the process to the Bear line in 2013. A pressurized vacuum fills all the natural pores in the wood, increasing its weight and strengthening it. After baking, the handle is virtually impossible to warp, check, or crack, and all the grain and original beauty of the natural wood are intact.

BIRTHMARKS

You may notice some lighter areas on the FutureWood handle of a new Bear bow. These light areas appear only where the natural wood underneath is strongest. Birthmarks give each FutureWood handle section an identity of its own; no two are alike. Birthmarks form where the pores of the natural wood are closest together, thereby filtering out some of the injected material.

LIMITED EDITION BOW SERIES

With Fred Bear's inspiration, Bear Archery proudly presents the Limited Edition Take Down, the second bow in a series of four Limited Edition bows. This Take-Down will be an A riser with number 3 limbs made of beautiful Macassar Ebony and figured African Bubinga veneer limbs.

THE FRED BEAR WAY

Some say hunting with a bow is a handicap. Instead consider it an honor, because it demands your best.

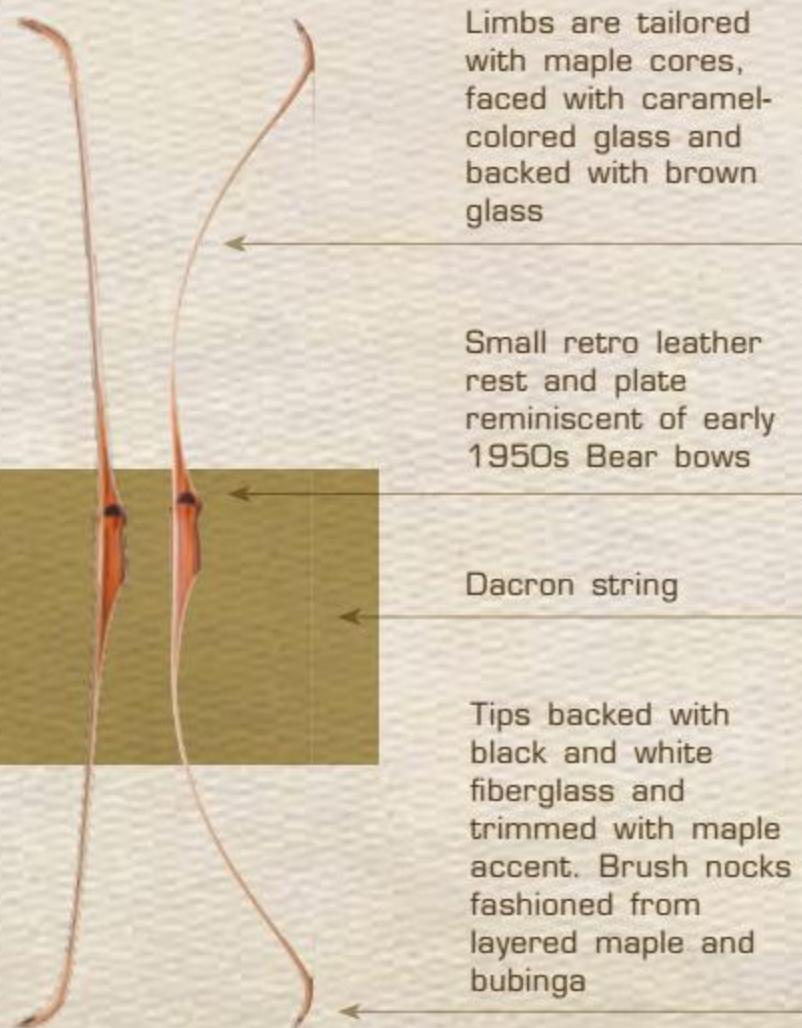

Fred Bear

/// NEW FOR 2018

STATIC K-4

TIMELESS QUALITY AND STYLING

This 64-inch static tip bow is a rebirth from 1952. Its sleek narrow design is reminiscent of a long bow with a recurve static tip that retains its shape during the draw cycle of the bow packing a powerful punch. The hand-shaped brush nocks and tips combined with the near center-shot design make this a bow for those who want the very best in styling and smoothness.

TAKE DOWN

YEARS LATER STILL ADVANCED

Mr. Bear's Take-Down design in 1969 was years ahead of its time. Not only does it pack easy, it shoots and feels like a dream. This legendary but modern design is available in both A and B risers, giving you plenty of versatility. Fred Bear hunted with this bow almost exclusively until his last hunt.

FEATURES

- A-Riser with #1 Limbs = 56" AMO
- A-Riser with #3 Limbs = 60" AMO
- B-Riser with #1 Limbs = 60" AMO
- B-Riser with #3 Limbs = 64" AMO

CONSTRUCTION

- 1 3-piece black maple riser with a red accent stripe
- 2 3-piece African bubinga and phenolic riser with a red accent stripe
- 3 Patented Fred Bear latch and socket take down system
- 4 Riser capped with fiberglass accents

Fascor powered limbs backed and faced with high-strength black fiberglass

Crowned, cut-on center arrow shelf with leather side plate and bear hair arrow rest

Dynaflight 97 Flemish Twist string

Tips handcrafted with layered hard-rock maple and black fiberglass to accommodate modern bow strings

SUPER KODIAK

CLASSIC THEN AND NOW

After 17 years of production, the Super Kodiak replaced the very popular Kodiak line of bows. Fred Bear used this model bow for many years. Few bows of any kind reward the hunter with such a classic combination of feel, power, and sheer shooting authority.

FEATURES

- 60" AMO length
- 64" AMO length
- Available in gloss or satin finish

CONSTRUCTION

- 1 Black phenolic 3-piece riser with a brown Bolivian rosewood accent stripe and capped with Bolivian rosewood. Grip capped with fiberglass accents.
- 2 Brown and black hard-rock maple 2-piece riser

KODIAK

THE RETURN OF THE LEGEND

Ask around about Bear bows, and you'll surely hear tales of the legendary 59 Kodiak. Throughout the years, Bear has been asked time and again to "bring it back." Out of respect, we were convinced the 59 Kodiak could never, and would never, be duplicated. But, like Mr. Bear himself, we believe in giving people what they want.

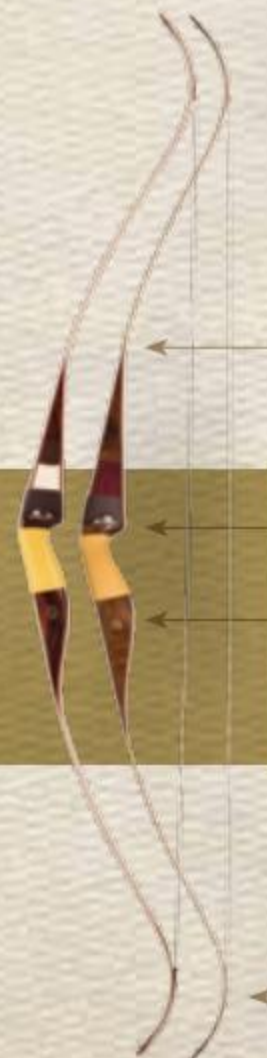

FEATURES

- 60" AMO length
- Available in gloss or satin finish

CHEYENNE

LOOKS GOOD AND FEELS EVEN BETTER

Cheyenne was a collaboration between father and son - Grant Neil Byce II, Fred Bear's retired master bowyer, and Grant Neil Byce III, Bear Archery's director of operations. The bow's length handles the swept-back style limbs of the Take-Down, while the grip is designed to feel full in the hand while incorporating the half-moon styling reminiscent of Fred's favorite bows of the early 60s.

FEATURES

- 55" AMO length
- RH only

CONSTRUCTION

- 1 Black and brown hard-rock maple 2-piece riser
- 2 Grip capped with fiberglass

KODIAK MAGNUM

SHORTER LIMBS BUT NOT LESS BOW

Modeled after the original, famous Kodiak bow, the Kodiak Magnum was first introduced in 1961 as a bow hunter's dream due to its short length and ease of maneuverability. The nimble, versatile design struck a chord with hunters who valued its blend of agility and power, and it's been proving its worth ever since.

FEATURES

SUPER GRIZZLY

FOR SMOOTH STEADY SHOOTING

The Original Super Grizzly was available in the mid-1970s and was reintroduced in 2011 to the delight of archers who prefer a smooth shooting feel. The Super Grizzly's performance is based, in part, on two layers of lamination in the limbs, creating a better feeling, better shooting bow without hand shock.

FEATURES

- 58" AMO length

CONSTRUCTION

- 1 Black maple 2-piece riser with inlaid red accent stripe
- 2 Additional layer of maple laminate in limb construction
- 3 Grip capped with fiberglass

GRIZZLY

TRADITIONAL VALUE STORIED RESULTS

The Grizzly is one legendary bow that has been proving itself since 1950. Mr. Bear made the last design change to the Grizzly in 1964. The value-priced bow is designed for big performance that will go easy on anyone's budget. Whether you are new to traditional archery or an expert, the Grizzly is a sure shooter for any skill level.

Limbs overlaid with clear maple and backed and faced with high-strength black fiberglass

SUPER MAG 48

ONCE IMPOSSIBLE STILL INCREDIBLE

In 1966 Bear introduced an effective, comfortable 48" hunting bow, proudly called the Bear Super Magnum 48. Today, it remains a proven performer for those who need a short hunting bow ideally suited for hunting out of ground blinds and treestands or for using as a lethal bowfishing tool.

Limbs overlaid with clear maple and backed and faced with high-strength black fiberglass

KODIAK CUB

QUALITY IS ALWAYS THE BEST WAY TO BEGIN

This 48" traditional youth bow was originally known as the Little Bear and was introduced in 1965. Forty-seven years later your youngster can still have a laminated bow of adult quality just like mom and dad's. This is a smooth shooting youth bow and is great for teaching archery fundamentals the right way.

AU SABLE

AS ELEGANT AND SATISFYING AS YOU WOULD EXPECT

The Au Sable longbow, aptly named after Michigan's famous Au Sable River, was introduced in 2011. It's been well received by longbow enthusiasts due to its reflex/deflex design, larger sight window, full-radiused grip, and crowned, and cut-on center arrow shelf. Maple and Bamboo-core limbs make this bow smooth, quiet, and fast.

Three layer limbs constructed with a Maple core, overlaid with two layers of Bamboo and backed with high-strength black fiberglass

PATRIOT

THE CLASSIC CREATIVE COLLABORATION

Byron Ferguson, a trick shot specialist and renowned hunter, worked with Bear Archery to create this special longbow. The design is Byron's, manufactured by Bear Archery, creating a spectacular shooting bow with the classic look of Bear and characteristics unique to Byron. The Patriot is sure to please anyone wanting a high-performance longbow.

Hard-rock maple limbs backed and faced with high-strength black fiberglass

- 3 Supple leather grip

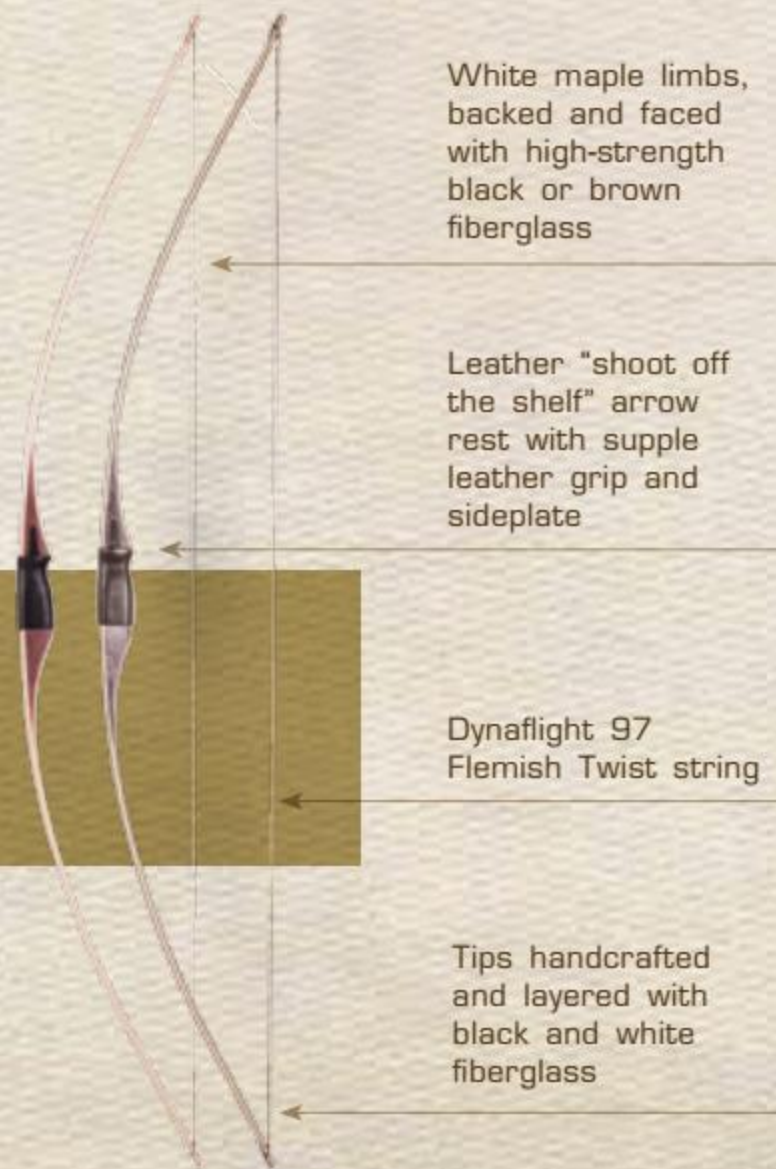

MONTANA

THE REAL THING FOR TRUE BELIEVERS

The Montana longbow was first introduced in the late 90s and has become a very popular addition to an already proven lineup. The bow's slightly reflexed design, tapered limb lamination, and new slimmer tips make this longbow big on performance and value.

FEATURES

- 64" AMO length

THE FRED BEAR WAY

Equipped with only your woodcraft and your bow,
any animal you take is a trophy.

Fred Bear

BEAR ARROWS

BY ROSE CITY

Rose City Archery and Bear Archery are partnering to bring you bows and arrows designed by Fred Bear himself and made in the tradition of the golden era of bowhunting. We are duplicating the finest Port Orford cedar arrows to match the entire Bear line of bows, including his famed Grizzly Recurve that Fred shot at targets and on hunts. The new commemorative Bear Arrows box is reminiscent of the box used in 1959, the year Fred Bear hunted and killed an Alaskan polar bear - with a Port Orford cedar arrow. The box keeps fletchings smooth and points in their own compartment, and ships wrapped in craft paper to arrive in a condition worthy of a keepsake.

SUCCESS BEGINS HERE

This sport is an art. It requires daily discipline and sacrifice to fine-tune your craft – a repetitious execution to correct your form and your shot. At Bear Archery, we know this continual preparation is what makes you successful and provide the tools to give you confidence in the field.

RECREATIONAL

ALL IN ONE ARCHERY CART

The cart is made from rugged 1" 18 gauge steel tubing with an all-weather durable black powder coat, weather resistant zinc plated hardware and 6" diameter heavy-duty, all-terrain molded caster wheels.

Cart Includes:

- (3) Foam targets
 - (3) 36" (10 Ring) target faces
 - (3) Tripod target stands
 - (3) Titan bows
 - (3) Firebird bows
 - (72) 28" Safetyglass™ vaned arrows
 - (6) Armguards
 - (6) Shooting gloves (3) medium, (3) large
 - (3) Ground quivers
 - (1) "ABC's of Archery" manual
- A4400** W: 25" D: 53" H: 28 1/2"

ROUND TARGET FACES

These tough, long-lasting skirted target faces are spun with heavy-duty waterproof fabric and screened with a 10 ring multi-colored ink that is weather and UV resistant.

- A36RD** 36 - 40" diameter
- A48RD** 36 - 48" diameter

SQUARE TARGET FACES

Target faces are long lasting, weather and UV resistant, and made of heavy-duty waterproof material.

- A48SQ** 36 - 48" diameter

FOAM TARGET

Our best targets are constructed of 100% self-healing foam. Targets are resistant to wear, waterproof, UV resistant, and impervious to insects. These targets are reversible, boosting the life of your targets-offering you better value.

- 10 Ring face included
- Perfect for adult and traditional bows

- A736** 36" diameter, 6" thick
- A748** 48" diameter, 6" thick

WHEELED BLACK TARGET STAND

The stand is easy to move, sturdy, and stable with a durable powder coat finish. For use with 36" and 48" targets.

- A5000**

TRIPOD TARGET STAND

This heavy-duty, black powder coated tripod stand is used with 36" targets only.

- A5005**
