THE TALON FRAME

The Talon Frame is the lightweight heavyweight of the Grip Frame family.

With a smaller, lighter footprint, the Talon is an ideal fit for women and youth, yet remains a nimble option for ounce-counters of any size and shape. Possessing the same pack-out prowess of the original Grip Frame, the Talon is ready to handle anything you can throw on it.

The Talon is compatible with all Grip Enabled bags, and Grip Enabled accessories. This ensures that you have the perfect pack system for the adventures ahead.

Vise Frame shown here with the Cure bag (1200 CI)

You don't have to settle for a pain-staking pack-out when the real work begins. The "Grip" frame is designed to help eliminate the discomfort of a heavy load. The suspension is built rigid and stout and supports a heavy load similar to an external frame. Unlike an external frame, you can carry your gear with you and don't have to return to the truck to get it when you make a kill.

When it comes to hauling hero loads out of the mountains, nothing beats the strength and rigidity of an external pack frame - like the rock-solid Grip technology found in the Grip and Talon frames.

Look for Blacks Creek packs that are Grip Enabled. These require the use of either a Grip or Talon frame to complete the pack system. This powerful combination ensures that you will be hauling your trophy in comfort with more capacity than ever expected.
