WELCOME TO BERSA

OUR PROMISE

We stand as unwavering allies in your journey, a steadfast presence that supports you through every struggle. Our products are more than just tools – they are companions on your path to greatness, devoted to uplifting and empowering you. We are committed to being a source of resilience, consistently there to assist you in conquering challenges. Like a loyal ally, we strive to continuously evolve and improve, mirroring your dedication to personal growth. With Bersa, you are not just a customer; you are a fellow adventurer in the pursuit of excellence. Together, let us forge a legacy of strength, trust, and unwavering support, as we work tirelessly to be better – just like you.

FULL SIZE

M2XI

Made In The U.S.A.

The BERSA M2XI 9MM Pistol redefines precision and performance for shooters who demand reliability, accuracy, and comfort. Built with a 416 stainless steel slide and frame, this pistol is as durable as it is sleek, thanks to its resilient black nitride finish. At its core is a 5-inch ultra-match bull barrel with a 1:10 twist and six-groove rifling, delivering pinpoint accuracy for both defensive and competitive shooting.

Designed with ergonomics in mind, the M2XI features a high-grip injected polymer grip module with stipple patterns, a checkered front and rear palm grip, and an extended beavertail for superior handling and reduced fatigue. Whether you're on the range or in the field, these enhancements ensure maximum comfort and control.

M2XI

Double Stack

Built with a durable 416 stainless steel slide and frame, and a precision 5-inch ultra-match bull barrel, this pistol ensures unmatched accuracy and reliability. Ergonomically designed with an injected polymer grip, extended beavertail, and flared magwell, it offers superior comfort and control. Equipped with co-witnessing raised rear iron sights, a front night sight, and a Holosun K-Series optics cut, the M2XI excels in rapid target acquisition. Complete with ambidextrous controls, a Picatinny rail, and dual magazines (17 and 22 rounds), it's the ultimate tool for defense and competition.

COMPACT

BAR9

4 IN / 8 IN

With the enormous growth in popularity of pistol caliber carbines, BERSA has entered the market with its new USA-made BAR9. One of the most interesting aspects of the BAR9 is that it accepts the same magazine as a double stack Glock® double stack pistols. This allows users to carry two types of guns – a sidearm and an AR pistol – and effortlessly interchange the same magazine between them. This brings a new level of convenience to law enforcement and civilian users alike.

A black semi-automatic handgun is shown from a top-down perspective, lying on a brown, textured fabric surface. The handgun has a suppressor attached to its barrel. A magazine is visible below the trigger guard, and a single round is shown in the foreground. The text "Section 3" is written in a white, sans-serif font, and "SUPPRESSORS" is written in a larger, bold, white, sans-serif font, both positioned to the left of the handgun.

Systems

THESE SUPPRESSORS ARE DIFFERENT SERIES — INTRODUCTION

WhisperTech offers a unique suppressor system utilizing the patented Couvillion method, distinguishing it from traditional Maxim method suppressors. It offers smaller, lighter, and more accurate features with comparable sound attenuation at the muzzle and improved performance at the shooter's ear position. Key features include minimizing ballistic POI shift, reduced muzzle flip, minimal breach blowback, and user-serviceability. Originating from the need to meet specific requirements, the WhisperTech line offers solutions for multiple use cases. Originally sold under Acadian Armament, these suppressors have been praised by civilian and professional users.

01 SOLIDS SEPARATION

New Patented Technology

WhisperTech uses the patented solids-separation method to remove solids from suspension, letting the gases flow through the device. The gases generated by the detained solids join the gas flow through the device.

03 MINIMAL BLOWBACK

While the solids are removed from suspension, the core lets the gases flow through the device away from the shooter

02 SUPERIOR SOUND ATTENUATION

Compared to similar sized suppressors.

04 SMALLER FOOTPRINT

Slim profile allows mounting within standard 1.25 in AR handguards. Advanced core design maintains performance.

PRECISION

B65-P

Precision Series
6.5 / .256 cal Suppressor

The B65-P is a direct-thread 6.5mm / .256 caliber suppressor engineered for precision shooting, delivering unmatched accuracy and consistency. Its innovative two-stage suppression design has demonstrated conclusive test results, including reduced yaw and drag, zero ballistic point-of-impact shift, tighter groups, and consistently enhanced accuracy. The B65-P achieves this through an industry-first approach to gas management, which creates a harmonic effect of moving the vibrational node closer to the muzzle. Featuring a hybrid endcap design, it minimizes recoil and flash, enabling shooters to “stay in the glass” for faster follow-up shots with little to no first-round flash. Built to excel in every aspect of suppressed shooting, the B762-P is the ultimate tool for precision marksmen.

01
Two Stage Suppression - No
Ballistic POI Shift - Tighter Groups

02
Hybrid Endcap Design -
Minimizes Recoil

03
Advanced Solids Scrubber -
Maximizes Flash Suppression

SPECIFICATIONS

Caliber	6.5mm/.256 Cal
Threads	5/8x24*
Materials	2024 Aluminum / 17-4 Stainless
Weight	12 oz
Length	7.1 in
Diameter	1.5 in
Rating	Semi-Auto
Attachment Method	Direct Thread
Finish	QPQ® & Type III Anodized
Colors Available	Black

DUTY

B9-X

Full-Auto Rated
9mm Suppressor

The B-9X is a full-auto-rated 9mm suppressor designed for peak performance and durability. Featuring a MonoCore Design, it minimizes blowback, reduces muzzle rise, and mitigates recoil for a smoother, more accurate shooting experience. Crafted from rugged 17-4 HH1150 stainless steel, the B-9X delivers unmatched reliability, even in demanding full-auto applications. Its direct-thread attachment ensures secure and versatile compatibility with various 9mm platforms. The suppressor can be fully disassembled, making maintenance and cleaning quick and easy. With the B-9X, you get precision engineering built to handle the toughest conditions.

01

No Ballistic POI Shift - Monocore Design also minimizes blowback, muzzle rise, & recoil

02

17-4 HH1150 Construction - Durable enough for full auto application

03

Easy Disassembly - Without special tools, makes cleaning quick and extends suppressor life

SPECIFICATIONS

Caliber	9MM NATO / .30 Cal.*
Threads	1/2x28 Direct Thread**
Materials	17-4 Stainless Steel & 7075-T6 Aluminum
Weight	11.7 oz
Length	6.4 in
Diameter	1.3 in
Rating	Full-Auto Rated
Attachment Method	Direct Thread
Finish	QPQ® & Type III Anodized
Colors Available	Black

DUTY

B556-X

Full-Auto Rated
5.56 / .223 cal Suppressor

The B-556X is a full-auto-rated 5.56 suppressor designed for unmatched performance and durability. With a slim 1.2" diameter, it seamlessly integrates within most AR platform handguards for a sleek and functional setup. Constructed from rugged 17-4 HH1150 stainless steel, it delivers exceptional strength and reliability under the most demanding conditions. Its advanced MonoCore Design ensures superior sound attenuation by efficiently managing gas expansion and noise reduction. The direct-thread attachment provides a secure and straightforward mounting solution, making the B-556X the new benchmark for 5.56 suppressors. Compact, durable, and high-performing, it's built to excel in any scenario.

01

Slim Profile - The 1.2 in diameter allows mounting inside most standard AR rails

02

Compact, Rugged, & Serviceable - Stainless steel construction to take the punishment of full-auto firing schedules

03

Superior Sound Attenuation - The monocore design allows for efficient gas expansion and hearing safe shooting*

.22-556

B-22

.22 LR - 5.56 NATO
Suppressor

The B-22 is a versatile .22 LR suppressor engineered to handle everything from rimfire to centerfire calibers, including 5.56mm ammunition. Its efficient MonoCore Design ensures exceptional durability and performance across a wide range of platforms. Built from rugged 17-4 HH1150 stainless steel, the B-22 offers unmatched strength in a compact, lightweight profile that balances perfectly on even the smallest firearms. This direct-thread suppressor is compatible with calibers ranging from .22 LR to 5.7x28, making it the ultimate solution for small-caliber firearms. Whether for precision shooting or casual plinking, the B-22 delivers reliability, versatility, and superior suppression. One suppressor, countless possibilities.

01

MonoCore Design - Efficient core design means rimfire size and centerfire durability

02

Ultra Small Profile - Designed to fit under standard AR pattern rails

03

.22 to 5.7x28 Compatibility - One suppressor for all of your small caliber platforms
