THE ORIGINS

Since its foundation in 1958 by Ezechiele “Oscar” Chiappa, the Chiappa Group has grown from a small artisanal workshop into a globally recognized leader in the firearms industry.

Renowned for its commitment to quality craftsmanship and innovation, the group has established itself as an international powerhouse, exporting to over 60 countries and setting new standards in the production of both historic replicas and modern firearms.

SAPL ACQUISITION: A STRATEGIC EXPANSION

Established in 1983, Société d'Application des Procédés Lefebvre (SAPL) is a French company renowned for its quality and innovation in the firearms and ammunition sector. Specializing in less-lethal weapons, SAPL produces a range of products including rubber bullet ammunition, tear gas cartridges, and riot control equipment designed for self-defense and law enforcement applications. Their expertise has made them a trusted supplier to police forces in France and over fifty other countries worldwide.

In November 2024, the Chiappa Group announced the acquisition of SAPL, marking a strategic expansion into the security sector. This partnership aims to consolidate the strengths of both companies, allowing SAPL to strengthen its operations, optimize production capabilities, and introduce innovative products to both French and international markets. Rino Chiappa, President of the Chiappa Group, stated, “With this agreement, Chiappa confirms its commitment to growth and progress, embarking on a strategic collaboration with SAPL aimed at consolidating the strengths of both companies to ensure the best support for future development.” Emilie Lefebvre, CEO of SAPL, added, “Joining forces with the Chiappa group will provide us with the resources and expertise to navigate this next chapter successfully and build a strong future for SAPL.”

THE COMPANIES WITHIN THE GROUP

The Chiappa Group comprises six core companies, each contributing uniquely to its overall success and global reputation. Founded in 1958, the group has grown from a small Italian workshop into a prominent international powerhouse in the firearms industry, renowned for its commitment to quality, innovation, and craftsmanship. Each company within the group plays a vital role in upholding these values, enabling Chiappa to deliver a diverse portfolio of products, from historical replicas to state-of-the-art firearms. With a presence in over 60 countries, the Chiappa Group continues to set industry standards while embracing adaptability and excellence in a constantly evolving market.

Chiappa Firearms: The heart of the group, proudly manufacturing all its products entirely in Italy. With a legacy rooted in craftsmanship and innovation, Chiappa Firearms produces a diverse range of high-quality sporting firearms, historical replicas, and cutting-edge designs such as the revolutionary Rhino revolver. Its commitment to Italian-made excellence ensures reliability, precision, and global recognition

Chiappa Firearms USA: A pivotal player in the North American market, managing distribution and local production. It specializes in defense-oriented shotguns tailored to meet the unique demands of this key market.

Kitam: A leader in the development and production of state-of-the-art semi-automatic sporting pistols, delivering innovation and reliability in every design.

Costa Trattamenti: Renowned for its advanced surface treatments for metals, Costa Trattamenti also offers cutting-edge coating technologies like Cerakote and Mystikote. These specialized finishes not only enhance durability but also provide superior aesthetics, meeting the highest standards in firearm finishing.

Merak Arms: Dedicated to the production of shotguns, including the popular Charles Daly brand, Merak serves both European and American markets with a focus on maintaining high quality and market relevance.

SAPL: The latest addition to the group, this French company enhances the Chiappa Group's capabilities in self-defense and law enforcement sectors. SAPL brings a legacy of expertise and opens new opportunities for innovation and synergy within the group.

 **RHINO**
REVOLVER REVOLUTION

UNMATCHED INNOVATION

The Rhino line by Chiappa Firearms perfectly combines futuristic design with advanced technical solutions. From the iconic Rhino revolver to the CBR-9 pistol, every detail is designed to enhance the shooting experience by reducing recoil, optimizing precision, and ensuring maximum versatility.

With exceptional lightness and compactness, the models in this line offer superior handling without compromising on power or performance. Each firearm is a testament to innovative engineering, crafted to meet the demands of even the most discerning shooters.

Semiautomatic PDW CBR-9

The CBR-9 pistol is a weapon intended for personal defense and professional activities. The balance and ergonomics of this semi-auto pistol, along with the practical collapsible stock, grant compactness and efficiency.

FULL OF INCREDIBLE TECHNOLOGY - 3 PATENTS FOR ONE GUN

PATENTED BLOWBACK CLOSING SYSTEM:
We have significantly stabilized the pistol by exploiting the recoil kinetic energy of the bolt. This is achieved by using a lighter than usual bolt and a heavier than usual hammer. The hammer has a center of mass positioned below the point of impact with the bolt, this amplifies the length of the hammer center of mass compared to the bolt.

PATENTED MAGAZINE:
This unique proprietary double stack magazine has an asymmetrical placement of its retaining lips such as to offset the presentation of the cartridge. This added to some redesigned internal walls contributes to reducing the pressure on the presenting round, granting continuous feeding even with lips deformation up to 2.5mm

PATENTED EXTENDED STOCK:
This design allows for the stock to be completely hidden within the gun when closed and opening with curved guides to be in a lower position once open. The stock never interferes with the forearm leaving the shooter to be able to handle the pistol freely with one or two hands. Thanks to its improved stability can be held faster with no shoulder placement needed.

A SPECIAL COLLABORATION

The Chiappa Rhino Match Master is the result of a collaboration between Chiappa Firearms and Wilson Custom Guns, spearheaded by renowned gunsmith Richard Wilson. This partnership showcases a fusion of Chiappa's innovative design philosophy and Wilson's decades-long expertise in fine-tuning competitive firearms. Every detail of the Match Master reflects Wilson's meticulous attention to performance and reliability, from the revolver's unique ergonomics to the precise balance ideal for precision shooting. Crafted for shooters who demand excellence, this special configuration is engineered to deliver consistent results in the highly demanding PPC competition environment, elevating the capabilities of the iconic Rhino revolver to new heights.

RHINO CO₂

The Rhino CO₂ revolvers have been designed starting from the general technical schemes of the “Live Fire” models in order to obtain replicas as realistic as possible. The frame, grip skeleton and barrel are in light alloy and the grips, made of plastic, have been studied to replicate the look of the one-piece wooden, G10 or synthetic grips of the original Rhinos. The Rhino CO₂ line is available as **6mm BB Airsofts** or **.177-caliber** airguns.

REVOLVER 20DS

RHINO

The Rhino is the most innovative development in revolver technology in decades, if not since the creation of the revolver itself. Refusing to be constrained by tradition and previous design limitations, the Rhino has improvements that move the revolver forward into the 21st century. Unconventional in appearance and superior by performance, the Rhino fires from the bottom of the cylinder rather than the top, dramatically reducing muzzle rise and recoil felt by lowering the axis of the bore almost to the palm of the shooter’s hand. The 2-inch version comes equipped with a premium leather holster, combining practicality with the revolver’s groundbreaking design.

BADGER

FOLDABLE ADVENTURE

SURVIVAL AND ADVENTURE

The Chiappa Firearms' Badger line is offered in a range of configurations and calibers to meet the diverse needs of shooters. Each model features a lightweight, compact design that folds effortlessly for easy transport and storage, making them perfect for hiking, camping, or hunting trips.

With precision engineering for outstanding accuracy and reliability, these folding rifles are the perfect blend of functionality and style, ready to enhance your shooting experience.

LITTLE BADGER & LB TDX ADAMANTIUM®

Thanks to the collaboration with the specialized French company **SAPL**, the Little Badger becomes stronger and more versatile! This partnership brings **Little Badger Powered by Adamantium**, a patented **ultra-light carbon fiber suppressor** offering great performance and unique design. Both models are also available in a “fake suppressor” version, featuring a barrel cover that keeps the original length for nations where suppressors cannot be sold.

SAPL is a French company founded in 1983, specializing in non-lethal weapons, ammunition, and protective equipment for law enforcement. Known for innovations like the Adamantium silencers, which use carbon fiber and aerospace-grade materials for superior sound suppression and durability, SAPL plays a key role in advancing technology for the defense and security sectors.

ADAMANTIUM PERFORMANCES

During testing, the Adamantium suppressor demonstrated a remarkable ability to reduce sound intensity, lowering the average sound level from 49.1 dB (measured over 410 shots without a suppressor) to 45.9 dB (measured over 458 shots with the suppressor). This reduction of 3.2 dB corresponds to more than half the intensity of the original sound, highlighting the suppressor's exceptional effectiveness in minimizing noise.

COMBINED SHOTGUN DOUBLE BADGER

Among all guns manufactured by Chiappa Firearms, the Double Badger folding combination gun is by far one of the most interesting and practical: extremely basic and yet sturdy, easy to use and not too heavy on your wallet, the Double Badger is a great choice for small game hunting or outdoors, for plinking or training, as well as a valid youth rifle to introduce the next generation of shooters to the basics of marksmanship, hunting and safe handling of firearms.

MODELS

The Chiappa Double Badger is available in several combinations, featuring a .410 or 20 gauge smoothbore barrel paired with a rifled barrel in either .22 LR or .22 Mag caliber. These combinations cater to different hunting or survival needs depending on the environment.

One setup is designed for hunting larger game with the rifled barrel and smaller game with the smoothbore. The other configuration reverses this approach, using the smoothbore for larger game and the rimfire barrel for smaller animals.

The Double Badger is a combined, over-under, break-action, folding shotgun uniting the effectiveness of the Little Badger and the Big Badger in one single unit, for easier storage in a backpack.

WILDLANDS
MODERN LEVER ACTIONS

UNLEASH YOUR ADVENTURE

The Chiappa Firearms' Wildlands lever-action rifles are a striking blend of modern aesthetics and contemporary functionality, designed specifically for today's hunters. Available in both the 1886 variant, known for its strength

and versatility, making it ideal for big-game hunting, while the 1892 variant offers a faster action, perfect for sport shooting. All models provide an ergonomic grip and smooth lever operation, delivering a timeless shooting experience.

LEVER ACTION TAKE DOWN
92 ANGLE EJECTION

Chiappa Firearms announces a new version of the Wildlands 92 centerfire lever-action rifle with takedown capabilities, a skeletonized polymer stock, patented M-LOK forend and an angled right ejection allowing the use of top-mounted optics.

CONVENIENCE AND RELIABILITY.

Chambered for the powerful .44 Magnum cartridge, the new Wildlands 92 AE Takedown can easily be stripped in two parts and just as quickly be put together again, making it easy to safely store away or pack in the great outdoors, making it an excellent choice for pilots, hunters, and others who may need a handy and capable survival carbine.

ANGLE EJECTION.

Unlike the other models in the Chiappa Firearms Wildlands line, the new Wildlands 92 AE Takedown lever-action rifle features an angled ejection window, ejecting empty shells to the right side thus allowing the use of top-mounted optical sights thanks to the MIL-STD 1913 Picatinny rail segments located over the receiver and handguard.

LEVER ACTION 1892

92 L.A. Wildlands represent a new line of lever-action rifles intended to project one of history’s most iconic gun designs and of John Moses Browning’s most acknowledged accomplishments well into the 21st Century, seamlessly blending their traditional technical layout with a full list of innovations and modern looks.

BLACK

The Black Wildlands 1892 offers a bold, tactical appearance with a textured matte black finish on the wood and a blued matte steel barrel. The rifle is designed with ergonomic enhancements such as a pistol grip stock, enlarged lever, and a patented triangular forend for superior grip and control. Its robust build and modern features make it the ideal choice for hunters who value durability, performance, and a rugged aesthetic in their lever-action rifle.

DARK GREY

The Dark Grey Wildlands 1892 lever-action rifle is a modernized powerhouse designed for versatility in the field. Available in both take-down and classic configurations, it features laminated grey wood stocks and a sleek grey Mystikote® finish for durability and corrosion resistance. A MIL-STD 1913 Picatinny rail is mounted for easy optic integration, while the take-down option offers portability and convenience, making it ideal for hunters who demand both functionality and style.

CLASSICAL

The Classical Wildlands 1892 maintains the timeless elegance of a traditional lever-action rifle, featuring finely oiled wood stocks and a classic color case finish. Not available in a take-down configuration, this version embodies the original spirit of the 1892, offering a smooth, reliable action with a classic look. Perfect for those who appreciate the vintage feel and performance of a well-crafted hunting rifle, this version provides the durability and power needed for any outdoor adventure.

MAIN FEATURES

The Wildlands 1892 series combines modern upgrades with traditional lever-action craftsmanship, designed for today's hunters. Key features include a patented triangular forend for enhanced grip, ensuring better control while aiming and firing. The pistol grip stock improves ergonomics, providing a stable and comfortable shooting position. Equipped with a MIL-STD 1913 Picatinny rail, the rifle allows easy integration of optics like scopes or red dots, enhancing precision at varying distances. The fiber optic front sight ensures quick target acquisition, even in low light

conditions. The threaded muzzle accommodates suppressors or muzzle devices, allowing for customization based on individual preferences. The rubber buttpad absorbs recoil, ensuring comfort during extended shooting sessions. Additionally, all Wildlands models come with a paracord sling, combining practicality and durability for outdoor use. These features make the Wildlands 1892 an ideal choice for modern hunters seeking versatility and performance in the field.

LEVER ACTION 1886

The 86 Wildlands model is the latest iteration of Chiappa’s 1886 lever-action rifle, designed to meet the needs and preferences of modern hunters and shooters. While preserving the core technical layout and features of John Moses Browning’s iconic lever-action, the 86 Wildlands introduces several enhancements that improve handling and control, particularly for the powerful .45/70 Government caliber.

Crafted with precision, the Chiappa 86 L.A. Wildlands Take Down lever-action rifle features a fully CNC-machined receiver for exceptional durability and performance. Coated in a Cerakote Tactical Grey finish, the rifle offers superior resistance to wear and corrosion, ensuring longevity even under demanding conditions, such

as extreme weather or heavy use. The modern aesthetic is complemented by dark grey laminate wood furniture, including a pistol grip stock with a rubber buttplate for comfort, and a triangular-profile forend for enhanced grip. Sling swivel studs provide additional versatility, making it a reliable choice for both field and tactical use.

920.422

920.411

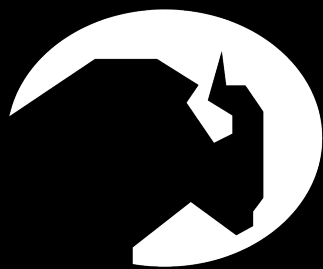

MAIN FEATURES

The Chiappa 1886 Wildlands lever-action rifles offer exceptional performance, combining classic design with modern enhancements. Available in Dark Grey and Black finishes, both versions feature a take-down design, allowing for easy disassembly and convenient transport. The patented triangular forend ensures a superior grip, enhancing control for accurate shooting, while the pistol grip stock improves ergonomics for a stable and comfortable shooting experience. A MIL-STD 1913 Picatinny rail is integrated for easy attachment of optics, enabling precise targeting. The fiber optic

front sight provides quick acquisition of targets in low-light conditions, and the threaded muzzle allows for the addition of suppressors or muzzle devices. The rubber buttpad absorbs recoil, reducing fatigue during extended use. These modern features, combined with the rifle's robust construction, make the 1886 Wildlands a versatile and reliable choice for hunters seeking a high-performance lever-action rifle.

CONVENIENCE, PERFORMANCE, SAFETY, FUN FACTOR.
The LA322 lever-action carbine is one of the best, most practical and funniest rimfire variants of the classic lever-action rifle design, bringing a technical layout that made history into a whole new dimension, just as apt for leisure plinking and target practice as it is for target shooting competitions, pest control and varmint hunt. In general, the LA322 is a highly successful marriage between the elegant and fine lever action rifles from Chiappa Firearms and modern replicas of small caliber. The “simplification” of the LA322 compared to other lever action rifles structured, which is perfectly in line with the light gauge, on the other hand, it brings the undeniable advantages linked to a formidable ease of use.

920.432

920.427

Currently the rimfire rifle is available in 4 configurations, all Take-down 18,5" (470 mm) barrel with 15 rounds capacity, 35,5" total length (902 mm) and 5.5 lbs weight (2,5 kg), keeping the overall package as faithful to the original as a training and youth rifle can be. The Deluxe version has an oil finished checkered walnut pistol grip stock with rubber recoil pad, while the two Standard models have straight or pistol grip beech wood stock, which makes it even more practical and comfortable to handle. The Kodiak cub version has black textured straight stock and Mystikote Kodiak finish on the receiver, the Deluxe model features a Mystikote Tac.Grey ceramic coating.

920.414

HISTORY AND INVENTION

The Mare’s Leg® gained fame thanks to its appearance in classic Western films and television shows, particularly through the character of Steve McQueen in *Wanted: Dead or Alive*. Originally designed by John Browning as a lever-action rifle, the Mare’s Leg was reconfigured into a short-barrel version for law enforcement and civilians seeking a more maneuverable firearm. Its distinctive design, combining a pistol grip and shortened stock, made it iconic for quick-draw situations. Today, the Chiappa 1892 Mare’s Leg carries on this legacy with modern upgrades, providing a perfect balance of historical allure and practical use.

LEVER-ACTION RIFLES

SPENCER

The Spencer Rifle gained fame after being adopted by the Union Army during the American Civil War. A manually operated lever-action fed from a magazine tube in the buttstock, the Spencer rifle was a vast improvement over muzzleloading rifles used during the war. Chiappa Firearms’ reproductions are manufactured from precision CNC parts precisely joined to beautiful, hand oiled walnut stocks. Color case finish receivers are joined to precision rifle barrels with a blued finish.

MODELS

The two models produced by Chiappa are the centerfire long and short version, Rifle and Carbine, both chambered for .56-50, .44-40 and .45 long Colt caliber. Barrels are respectively 20” (508 mm) and .30 (762 mm) long.

The total lengths are thus 37 and 47 inches (940 and 1,140 mm). The Rifle models have three metal bands on the long forehand. The Carbine has the saddle ring on the left side.

GREAT HISTORY

The Spencer rifle holds a unique place in history as the first successful repeating rifle ever produced. Its innovative design revolutionized firearm technology during the mid-19th century, offering soldiers a significant advantage on the battlefield with its lever-action mechanism and reliable performance. Today, Chiappa Firearms proudly stands as the sole manufacturer producing authentic replicas of this iconic firearm, ensuring its legacy endures for enthusiasts and collectors alike.

SHARPS

Chiappa Sharps rifles capture the true craftsmanship and nostalgia of the original design, CNC machined for precision and performance and target grade accuracy. Beautiful walnut stocks are finished and fit by hand to each barreled action by craftsman for true custom rifle performance, appearance and quality. The Sporting and Business models feature double set triggers while the Infantry, Cavalry and Carbine models feature single triggers.

MODELS

Sharps rifles are available in Military Models and Sporting Models, each designed for specific needs.

Military Models include Cavalry, Infantry, and Berdan versions. The Cavalry and Infantry models feature a patch box. Both three features a tapered round barrel with the Infantry having a longer barrel.

Sporting Models emphasize precision and elegance. The Sporting Rifle offers options like a Pewter tip forend, octagonal barrel, and patch box. The Business Rifle has a more practical design, while the Down Under model, with its octagonal barrel and Hartford collar, is ideal for long-range accuracy.

920.028 (DOWN UNDER)

920.017 (1859 BERDAN)

American Civil War reenactors or history enthusiasts can own accurate, faithful reproductions of the 1859 Sharps model and shooters can use the 1874 models also for long range shots (800-1.000 yards). Rifles, of course, can also be used with satisfaction when hunting.

910.014 (CAVALRY)

FALLING BLOCK RIFLES

LITTLE SHARPS®

The Little Sharps® rifles are available in 22LR, .22MAG, 22 Hornet or .38-55, 30-30, 44-40 and 45COLT. Like their larger counterparts, these beautiful rifles are CNC machined and matched to hand-oiled walnut stocks for a perfect fit. The length of the stock is virtually the same of the standard version, only with a softer angle, and consequently the centre of gravity is much more comfortable, and the rifle does not weight forward as by the bigger version. The ballistic precision, using the most performing calibers, is very high.

RIF. MOD. 920.188
MORE OPTIONS ON PAGE 94

920.188

In spite of its reduced weight, thanks to the calibers, the recoil is greatly reduced. The precision of Little Sharps, then, is virtually identical to that of the standard rifle, and its performance meets the requirements of the most demanding.

No wonder this small rifle has become a must for many Cowboy Action shooters, as it can be used both for long range and for single shot matches. On the other hand, many hunters who love traditional firearms will be more than happy to walk all day carrying a jewel of precision, but a featherweight on their shoulders!

Available in many calibers and different versions, the Little Sharps has already become a must for female shooters and for hunters who love traditional weapons.

BRAVERY

CIVIL WAR REPLICA

AUTHENTIC EXPERIENCE

Chiappa manufacturers faithful reproductions of some of the most famous historical black powder arms used in conflict between the Union and Confederacy, with exceptional historical details and hand-oiled one-piece walnut stocks.

Muzzleloading enthusiasts can rely on the quality and performance of Chiappa percussion pistols, muskets and rifles, still very popular among American Civil War reenactors, history enthusiasts, target shooters, and hunters.

MUZZLELOADERS SPRINGFIELD & RICHMOND

American Civil War reenactors and history enthusiasts can own accurate, faithful reproductions of the most famous arms used in conflict between the Union and Confederacy, as the Enfields and Springfields. Chiappa Firearms pays close attention to historical details such as barrel bands, ramrods and sights, complete with hand oiled walnut stocks.

MODELS

Three Springfield models are produced by Chiappa Firearms, the 1842 Springfield models (smoothbore and rifle) are calibre .69 chambered and 1861 Springfield in .58 calibre. The two 1842 models have 42" (1.067 mm) barrels, are 58" long (1.473 mm) and weigh 10,6

lbs (4,8 kg). The 1861 Springfield musket has 40" (1.016 mm) round barrel, 56" (1.422 mm) total length and 8.4 lbs (3,8 kg) weight, of course three bands on the forehand.

900.000 (1842)

910.000 (1861 SPRINGFIELD)

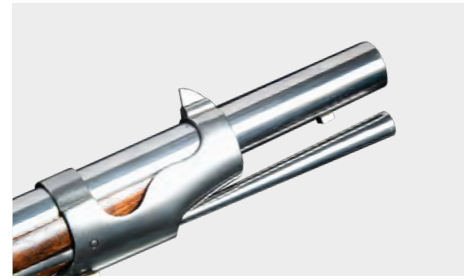

910.001 (1862 RICHMOND)

In Springfield Model the barrel is forged with a specific swelling in the rear part, which is milled to obtain the breech and the drum, and the lockplate with an accentuated "C" profile derives from the 1855 model. The 1842 Musket and the 1861 Springfield have barrel and locks in a white finish, while the 1853 Enfield Musket have blued barrels and color case locks.

CONSTRUCTION

All rifles' parts are made with numerical control machines (CNC) for the production of mechanically created resistant steel components, such as lockplates, or for the creation of any type of stock and other smaller parts; to the manufacture of gun barrels.

These rifles are carefully assembled by hand, visually inspected and fire tested. The walnut stocks are finished and fit by hand by craftsmen for true custom rifle performance, appearance and quality.

MUZZLELOADERS ENFIELD & ZOUAVE

The Enfield and Zouave muzzleloader rifles are exceptional examples of historic American firearms, combining the craftsmanship and innovation of the 19th century with reliable performance. Both models offer a unique shooting experience, featuring traditional front-loading mechanisms and a rich military heritage. Perfect for reenactments, historical collectors, or those seeking a more authentic black powder shooting experience, these rifles deliver a blend of history and functionality that remains sought after by enthusiasts today.

ERGONOMICS AND STABILITY

The FAS 6007 semi-auto target pistol was developed in collaboration with professional shooters to significantly contribute to accuracy and handling during competitions. To optimize ergonomics, this pistol has many adjustable parts which can be precisely fit to the shooter for maximum

balance, stability and control. With the magazine centrally located in the grip, the FAS 6007 has superior handling characteristics and the longest barrel possible for excellent accuracy and velocity.

SEMI-AUTO PISTOL FAS 6007

The .22 Long Rifle caliber Chiappa Firearms FAS 6007 semi-automatic pistol has been developed in close collaboration with top ISSF shooters with the specific purpose of obtaining a platform with superior performances in handling and accuracy during official top level sport competitions. As such, the FAS 6007 was conceived to provide the highest possible number of totally user-adjustable features, allowing shooters to customize aspects such as ergonomics, balance, stability and control.

Introduction to the Technical Product Tables

This section showcases the complete range of Chiappa Firearms products, providing a detailed overview of the technical specifications and available configurations for each item. The technical tables are designed to be easy to consult and offer precise, targeted information for every product. Each table is organized to highlight key features through a series of dots that indicate the available configurations.

This structure allows you to easily compare models and identify the product that best suits your needs.

For additional information or clarification about the available configurations, please feel free to contact our customer service team or visit our website.

To read the tables, follow these guidelines:

- Each row represents a specific model or product variant.
- The columns list the different options and specifications (e.g., caliber, capacity, materials, finishes, etc.).
- The dots indicate the presence of a particular feature or configuration.
