ABOUT ICS

The First Manufacturer to Produce AEG In Taiwan

Everyone wants to be the winner in battlefields whatever it is real or virtual. The weapon for each warrior will be the key factor which determines who is the winner. You can only see the sights and the barrel from an AEG, however, the internal parts of AEG were combined with more than 400 parts which were be made by die-casting, injection, stamping press, forging, and CNC Turning and Milling...etc. over 20 complicated procedures and sophisticated technique process, to produce the high quality AEG for you. The story behind every AEG is the years enthusiasm and the hard work from the design and development team, also the spirit of high quality control demand from the production team.

The ICS founder Mr. Chu entered the airsoft replicas market in 1995 with enthusiasm and become the first AEG company in Taiwan and also the 3rd AEG company in the world which was specialized in designing and manufacturing for airsoft replicas.

As the professional airsoft replica market manufacturer, "Innovation, Efficiency, and High Quality" is the main concept of ICS. "No receive, produce, and sell the defective products" is also the principle that we insisted. By our insistent, we hold a small portion of the airsoft replica market and also leading other airsoft company in Taiwan to enter the global market. ICS also passed the ISO9001 Quality management systems.

To be the pioneer of Airsoft replica market, ICS has a strong R&D team which comprises with 16 experts from different industries. To combine the new technology with Airsofters' experience is our main design concept, therefore it made ICS possesses of the product differentiation benefits. In the future, we will devote ourselves to develop the new techniques continuously and get more patent certification, in order to provide our customers more modern and satisfied products. This is the persistent mission of ICS since always: "Innovation, Competition, Satisfaction"

ICS, The Best Thing We Create.

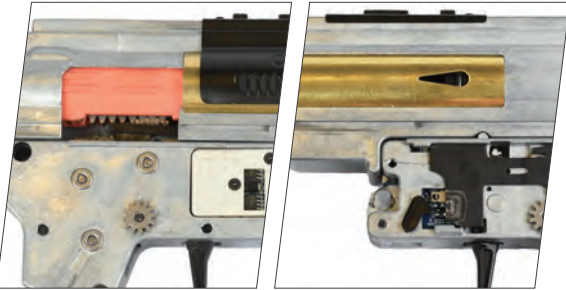

牛鎮宏

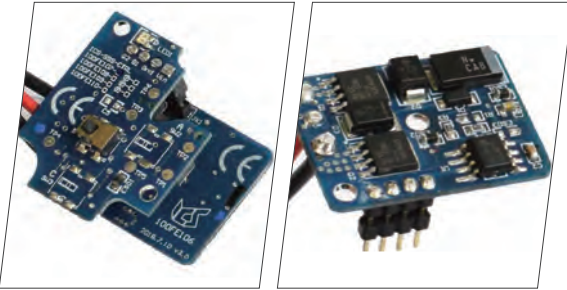

ICS PRECISION WORKMANSHIP

ICS invests in high precision CNC machines in order to produce high quality metal components such as receivers, RAS/RIS handguard, tactical rails and gearbox. All CNC machining components provide extremely realistic appearances as the real firearms. Even military standard 7075 aluminum can be processed for OEM customers.

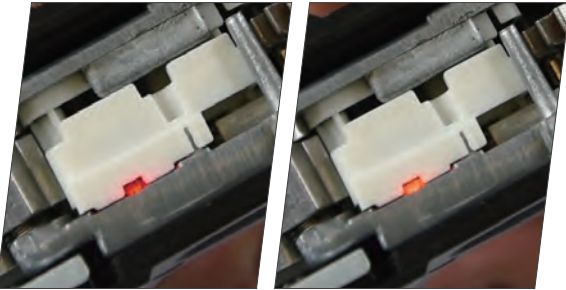

WHAT'S GOOD WITH THE NEW ICS SSS E-TRIGGER?

Pre-Cocking Function
With the new pre-cocking function, it could greatly increase firing speed and accuracy.

Elect. Active Brake
It is also featured with motor characteristic self-learning feature, adjust its operating power efficiency automatically to provide precise gear positioning while operating.

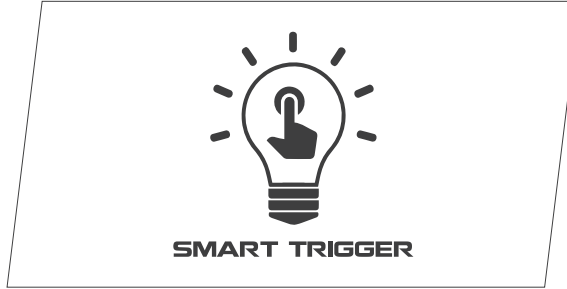

First "Self-Diagnostic Shooting System" in whole Airsoft market!
Troubleshooting is no longer difficult. With the ICS SSS electronic trigger system, it will be easy enough if you could identify the color of the glowing LED!

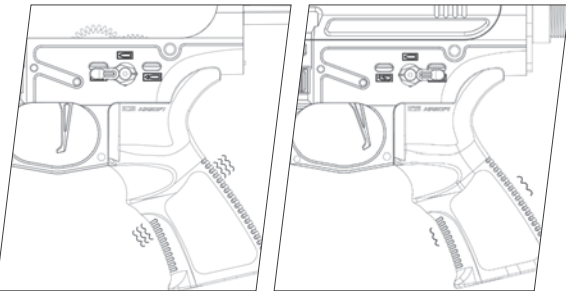

Green color glowing: Everything is OK.

Compatibility! Universal spec 3rd gear
All functions on the 3S E-Trigger System can be completely used without problem as long as the 3rd. gear has the universal fire selecting control cam.

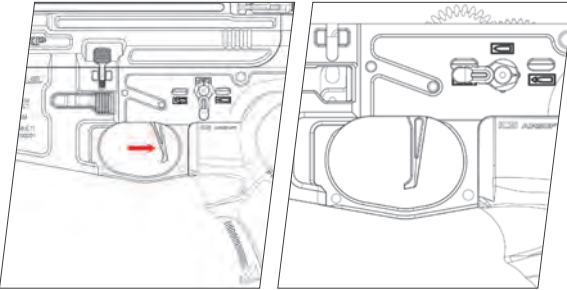

SMART TRIGGER
No one ever thought about making a trigger smart, but ICS did. The smart sensing unit senses every user's unique trigger pull, and smartly identify the pull to see if the user is short busting the gun or full autoing it. On top of the smart sensing unit the entire system comes with pre-cocking and short stroked trigger, making ICS's smart trigger unit much faster than the regular AEG trigger system. The new generation of smart trigger is coming, faster is now the choice for every shooter.

Low voltage detection and Self-protection
With the new pre-cocking function, it could greatly increase firing speed and accuracy. The SSS E-trigger will remind when the battery is running low, in order to protect the battery and your AEG.

When the battery is low, the motor will vibrate 3 times to remind that the battery will be depleted.
When the battery is depleted, the motor will vibrate once and you will not be able to fire.

Switchable Burst mode (Semi/Auto/3 round Burst)
Firing mode can be selected intuitively and with convenience. Pull and hold the trigger for 5 second under semi-mode can switch between Auto mode and 3 round burst mode. Firing mode will return to default setting (Semi+Auto) if you re-connect the battery.

ICS EXCLUSIVE REALISTIC DESIGN

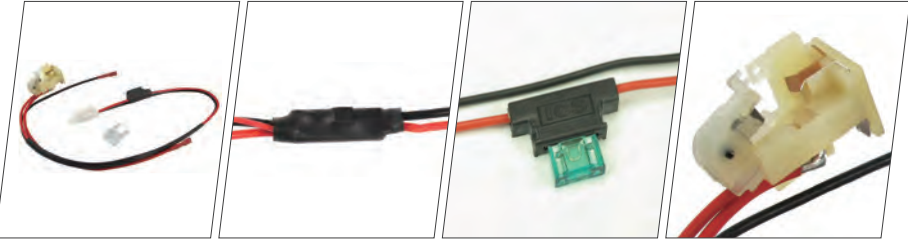

Split Gearbox & QD Spring & Spring Release
The QD Receivers, Split Gearbox and QD spring designs of ICS are designed to simulate disassembly of real firearms. This design makes upgrading, maintenance, and troubleshooting more easily, moreover, the spring release function could extend the service life of the spring to avoid elastic fatigue and decrease of muzzle velocity.

EBB System & Battery Stock Tube & Float H-UP
We want to make perfect improvement to the EBB system. Therefore, we detected and analyzed the cons of the traditional EBB system, thought outside of the box, and overturned the traditional design specifications. After two years of continuous research and testing, by using the simplest structural design to dispersed the impact that will cause damage to the structure, and after 100,000 tests, we finally achieved the perfect evolution that we expected.

ICS is committed to add the concept of ergonomics into the product. The design concept of the Ambidextrous fire selectors, charging handles, and magazine release button and even the design of the tactical grip and stock, is to make the products more comfortable for the players. The design of the battery stock tube can allow the battery wires to be hid in the tube, which not only can extend the battery capacity, but also the battery life.

Low Resistances Switch Assembly & Mini Fuse & Mosfet
ELECTRIC POWER is the power source of the AEGs. Constructing a low power impedance working environment is also an important issue. Therefore, ICS adopts a new conductive material and is widely used in electric switch blades and electric brake wire sets to provide a perfect low power impedance output environment. moreover, we also adopted a new type of electric brake wire set that featured with the latest wire with diameter of 16AWG, and full-silver-plated metal contacts, upgrade all fuse box to micro fuse box, which has lower power impedance, much more stable power system, generates less heat while operating, and a MOSFET is installed to eliminate the heat and power loss caused by the impedance, to maximize the power output to its best performance.

Advanced Upgrade Parts
The stock components for the ICS EBB models have been upgraded. which includes MIM processed Torque Gear, Full steel teeth with FRP piston, 8 Holes Ventilation Piston Head, Full Capacity Oversized cylinder, and Metal H-UP Set, which not only improves product service life, but also provides players a high-performance out of the box products, and the specs of the components are 100% fit the general specifications of current market.

CHALLENGE MORE

The Hi-Capa Challenger, like the name it was born to challenge. ICS Designed this handgun to Incorporate with our most advanced GBB pistol technologies. On the process we refined all the small imperfections to make the Challenger performs better than Tokyo Marui Hi-Capa while maintaining the compatibility. ICS would like to send this beast to compete with all the Hi-Capa products out there. We are confident to challenge, and the more we challenge the more we will improve.

SAR 9

SMART TACTICAL

S

SARSILMAZ®

The SAR 9 is a Sarsilmaz Licensed handgun and it's design was based on all the successful handgun features & handgun Ergonomics. This makes the SAR9 the new innovation to the small firearm market. ICS has spent the past 2 years redesigning the airsoft SAR9, integrating our most advanced Gas Blow Back technology, including the Revo Valves, Fixed Barrel, and CNC machined Slide assembly. We are proud to present this beautifully innovated handgun to the airsoft market, and would like to share the amazing performance with all the users.

SARSILMAZ®

The logo of SARSILMAZ® is registered trademarks of Sarsilmaz Silah San. A.S., Turkey
-www.sarsilmaz.com - and is used for airsoft replicas under worldwide exclusive license.

Fully licensed by Sarsilmaz Silah San. A.S., the SAR 9 is a high quality pistol built by ICS in accordance to the philosophy of "Producing the Best of the Pistols". It is a lightweight, new-generation polymer construction pistol.

KORTH PRS

GUIDANCE OF THE LEGEND

"IT HAS ALWAYS BEEN SOMETHING VERY SPECIAL TO OWN A KORTH."

Because every Korth is unique.
It used to be and still is today.

Half a century after Willi Korth presented his very first revolver the public, the manufactory Korth runs at full speed again.

The name Korth stands for unique gunsmithing. The revolvers, which we manufacture don't just shoot extreme precisely. Their appearance makes these weapons small art works that redound the glory of any man. The exquisite and individual products are valued as gifts to express highest recognition and find their way into the exclusive collections of passionate weapon collectors. The spirit of Will Korth to continuously improve even the very good things, you can feel in each weapon made by PTW KORTH Technologies GmbH. The best of steels, hand chosen timber and perfect mechanics are the ingredients, which are formed through experience, countless hours of hand working. Anyone, who has ever held a Korth in his Hand and felt its perfect balance, smooth operation and excellent timing, understands the phenomenon Korth The shooting results speak for themselves and are the confirmation of this spirit and passion. A Korth is a piece of exclusivity. Exclusivity that arises solely from the personal drive of their master Willi Korth ...
... to build the best revolver in the world!

KORTH PRS 4" GBB-BK

PRS, the very 1st KORTH licensed model of ICS GBB pistol series, which combined with realistic internal structure and authorized external profile. ICS perfectly replicated the iconic fixed barrel feature on the real firearm, and along with the special designed hex-anti-slip texture on the grip plate, which leads to a higher accuracy potential and a better grip while holding. Also, we adapted the adjustable trigger, which can be adjusted according to user's habits to make it an excellent shooting weapon.

Korth®

Begadi

Black Leopard Eye

ABOUT BLE

Pistol is a "must have" in all milsims or skirmishes. You will need leopard-like characteristics and perform them during games. You will not only acquire strong and sturdy figure, high maneuverability, and intelligent, but also could maintain extremely high speed while running. Thus, ICS has chosen the image of the leopard not only to represent the capability of the ICS pistols, but also could symbolize ICS's ability to maintain leopard-like vitality, viability and competitiveness on those brutal battlefields and this fast-changing airsoft market.

MONSTERLIKE DURABILITY RELIABILITY

The classical US Armed Force pistol M9, the trigger-hammer linkage function and ambi safety design make it a ambi-operable pistol. Due to its excellent performance and good reliability, it is widely used by military units in worldwide countries.

HERA ARMS COR

THE FUTURE IS NEAR

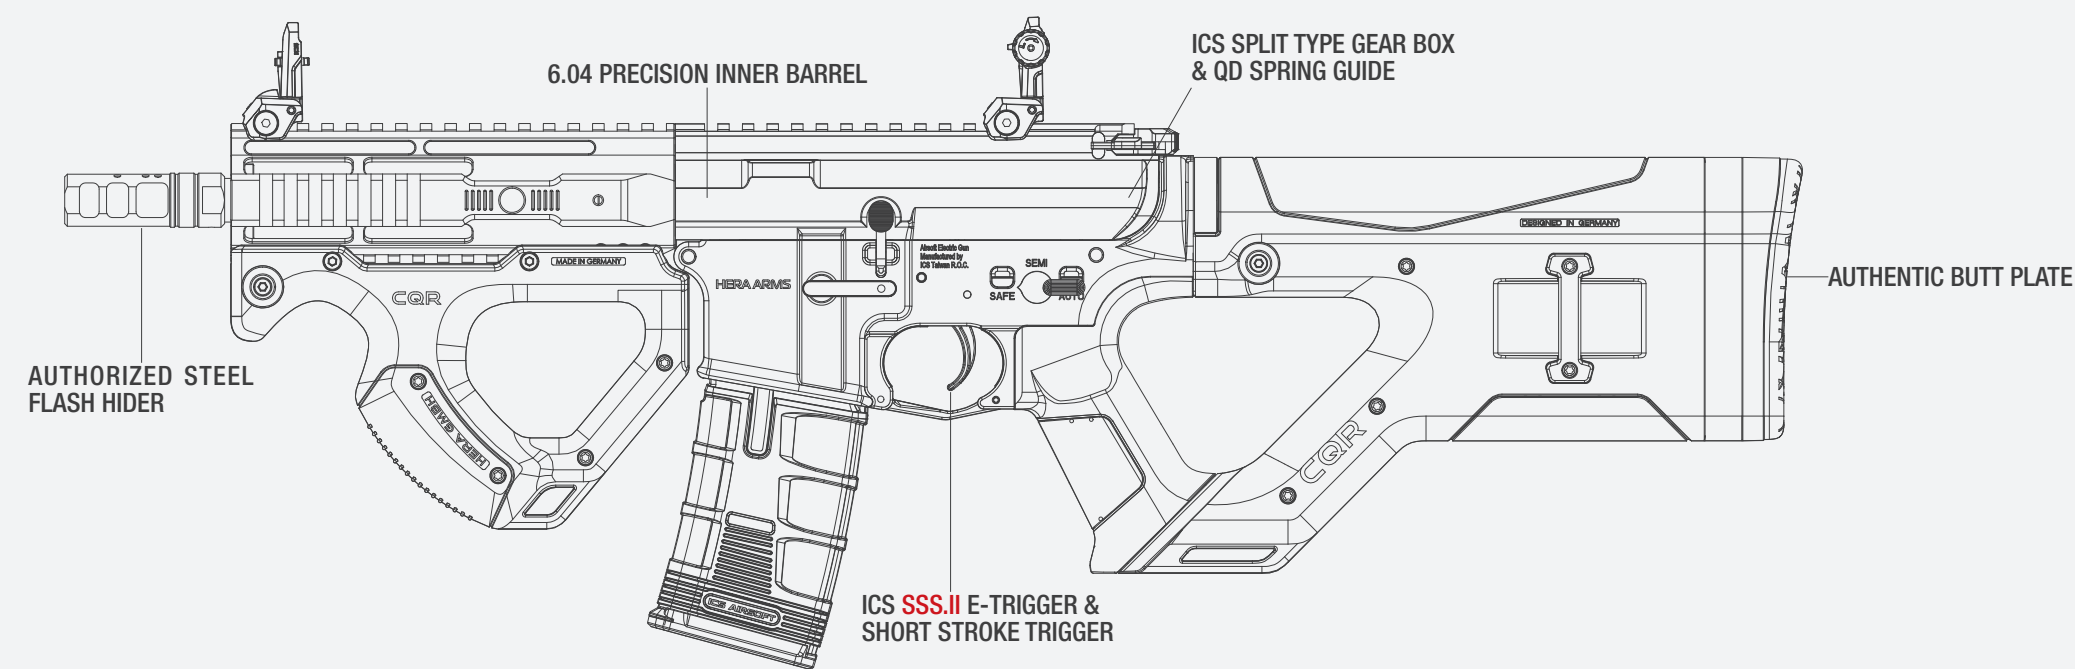

HERA ARMS COR

COR (Close Quarter Rifle) is a model featured with both performance and reliability, authorized by HERA ARMS, Germany under the joint partnership project by ActionSportGames and ICS Airsoft, and perfectly manufactured by ICS based on the CXP EBB series and applied with Original HERA Arms featured parts.

This outstanding model is also equipped with ICS's latest 2nd Generation SSS E-trigger system, which applied the pre-cocking function that could reduce the piston travel distance, and improve both accuracy and trigger responding time. The iconic ICS split gearbox and QD spring guide designs provide the capability for players to adjust and meet the limitation per different field and games.

LIGHTWAY-SERIES

PELEADOR 2.0 / PELEADOR

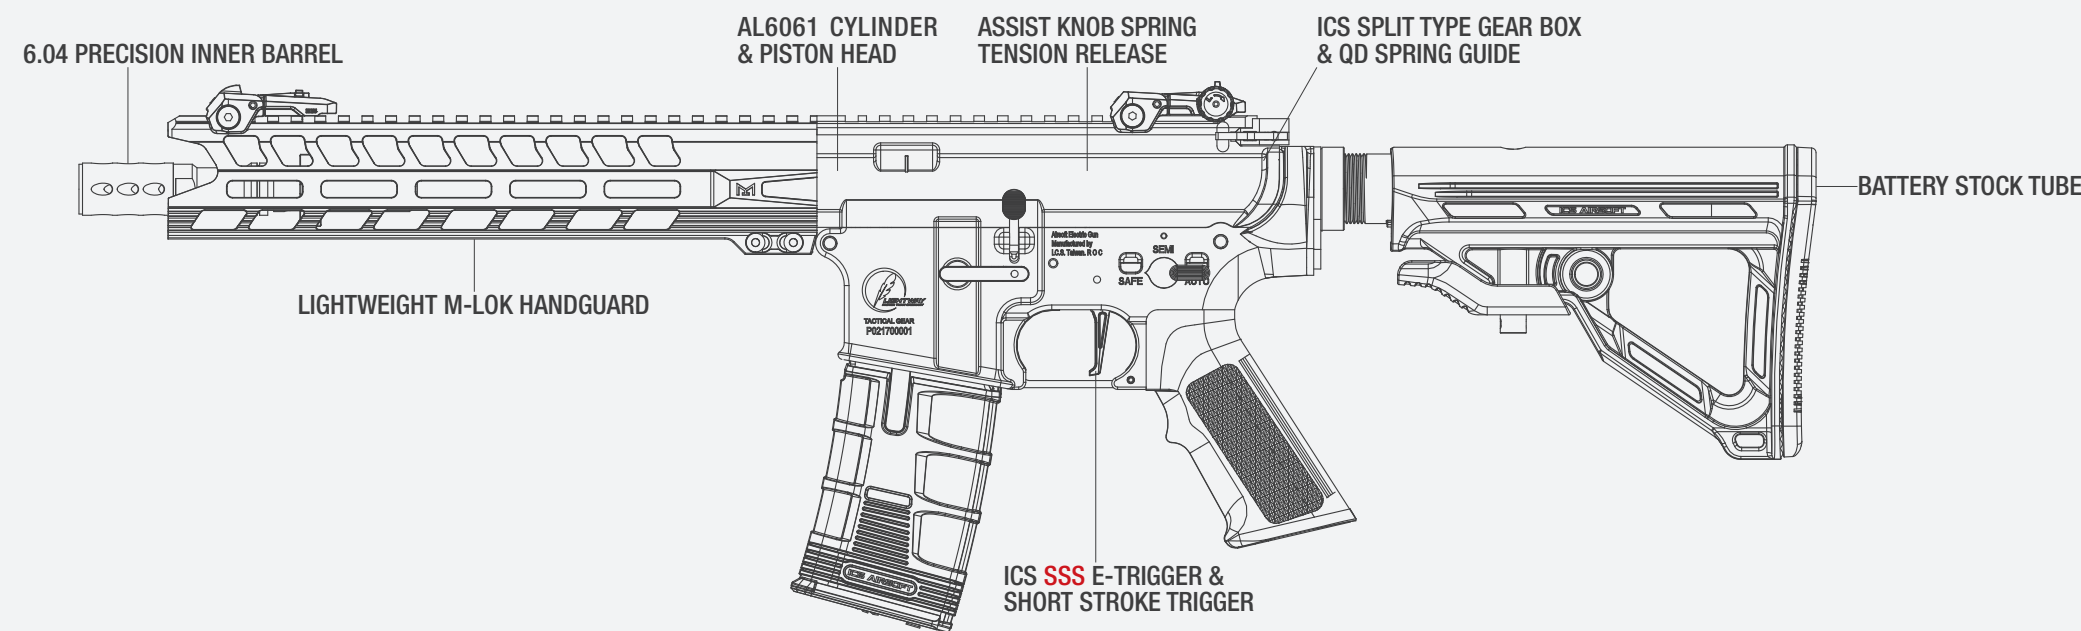

ABOUT LIGHTWAY

The lightway series is a belief that ICS could deliver the best performing AEG platform with the most cost effective pricing to both beginners and veterans. The specially designed AEG frame adopted all the great design DNAs originated from ICS; which is most ideal for players who are looking for a light weight package, that performs like a charm.

PELEADOR 2.0

M
M-LOK

Now ICS has been officially authorized by Magpul to use M-LOK standard, allowing us to provide more reliable products for the future of the airsoft industry.

The Lightway Peleador 2.0 is the new solution to performance speeding games. It is constructed from super high strength nylon fiber polymer, and is equipped with ICS's outstanding SSS electronic trigger system. The FRP piston unit and short stroked trigger makes this light weight AEG a real performer on the Airsoft field. By combining light weight construction and high performing internals, this is certainly the choice of gun for any players out there.

ICSCXP

ABOUT CXP

The CXP series is a brand new AEG combat platform developed and designed based on the existing SALW(Small Arms and Lightway Weapons) in the world today, which not only combined ergonomic and designs, but also applied with years of experiences gained by operating AEGs.

CXP-ARK

FEATURE INTRODUCTION

FUSION OF THE LEGENDS

ARK combines the two legends in the world of guns, taking the robust from the AK and integrating the precise from the M4. This fusion beast comes with ICS's newest V3 gearbox technology, featuring quick spring change and spring pressure release; but most importantly the SSS V3 Electronic Trigger System is now available in V3 Gearbox platform. We now can proudly announce, this is the product that can take the beating and shoot precisely in the field of airsoft.

- Inner Barrel: 230 mm
- Capacity: 230 Rds
- Weight: 2600 g
- Caliber: 6 mm

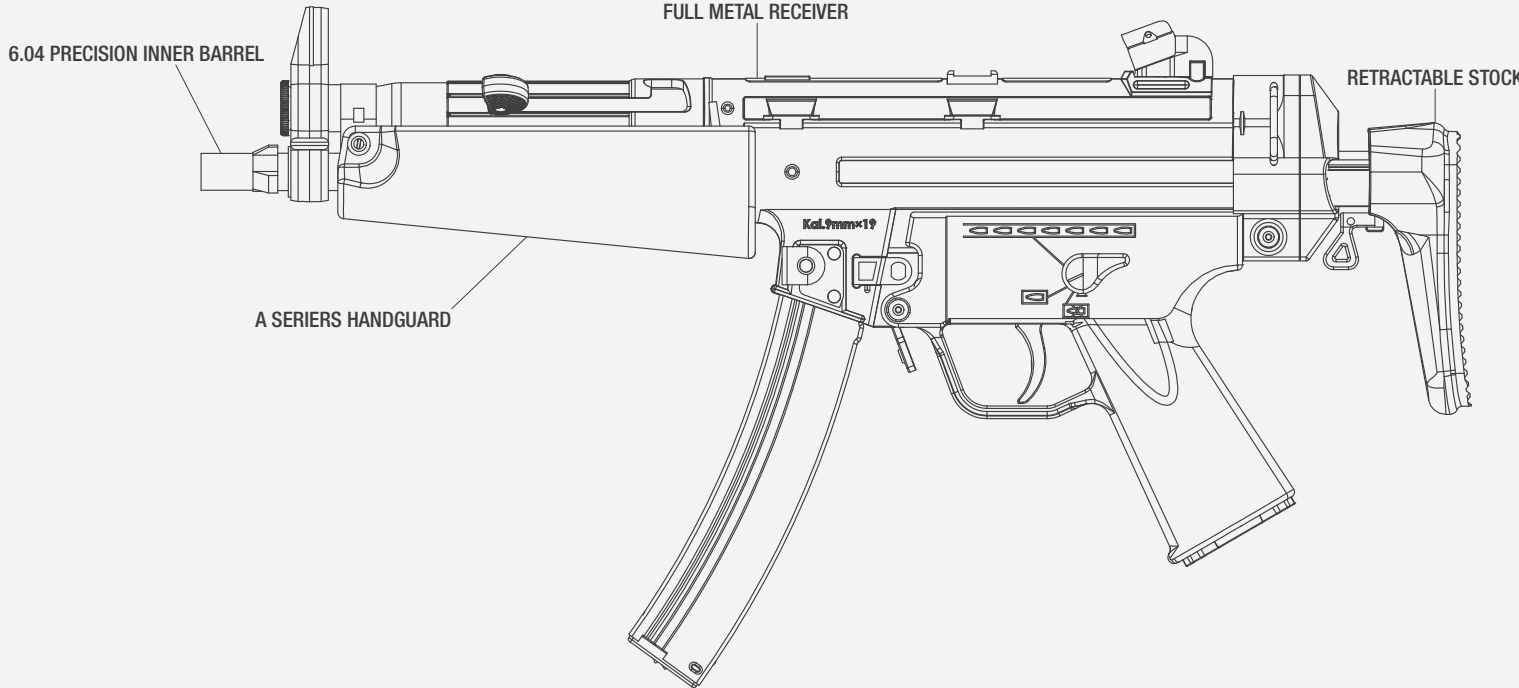

RETRACTABLE

The MP5 is the legend that lasted from 1960. To pay respect, ICS produces the CES-P frame as the real steel version, using the strongest steel and follows the real steel production method. The ICS CES-P is packed with the most advanced ICS SSS V2 Electronic Trigger System, this makes it the undefeatable AEG in the airsoft market. If you are looking for the most realistic MP5 that is equipped with the outstanding internals, then don't miss the ICS CES-P.

NOTE:

1. The product specification is for reference ONLY and may be subject to change.
2. Battery, charger and BB's are not included.
3. For AEG above 360 FPS, it is available to use 11.1V Li-Po or 9.6V Ni-Mh batteries; For AEG below 350 FPS, it is recommended to use only 7.4V Li-Po or 8.4V Ni-Mh batteries.
4. Muzzle velocity is measured by 0.20g BB's, and is adjusted to comply with market regulation /requirements for specific countries as shown below:
Below 106 m/s (350 FPS): Belgium, France, Netherlands, Portugal, Spain, UK
Below 100 m/s (328 FPS): Italy
Below 95 m/s (312 FPS): Japan
Below 45 m/s (148 FPS): Korea
