Lancaster Archery Continues to Expand with the World's Largest Selection of Archery Equipment

Your team of fellow archers here at Lancaster Archery wishes to thank you for your trust, friendship and business as we continuously increase our commitment to you and to the promotion of our beloved sport. Please look for our new website, coming in the summer of 2019, which is bigger, brighter and easier to use. With many advanced features, we are ready to assist our fellow archers in every way possible. We maintain a multi-million dollar, ready-to-ship inventory - with over 82,000 items from over 700 manufacturers in our 85,000 square foot distribution center - offering you absolutely the largest selection of 3D, Target, Bowhunting and Traditional Archery equipment in the world. Our purchasing and warehouse teams work tirelessly to maintain a 97-99.4% fill rate of stock items ordered. For anything in archery, we have it when and where you need it.

We have been blessed in so many ways, due to our lifetime involvement in archery, and we want to share that with as many people as possible. We continue to increase our contributions to countless worldwide, national, state and local archery organizations, clubs and school programs to show our appreciation for the efforts of volunteers to promote the growth of archery.

Caring, Integrity and Excellence are the values chosen as most important by our entire LAS staff. Since 1983 we have sought to constantly improve and expand our service and selection to serve you beyond your expectations, as we "Lead the World in 3D and Target Archery".

I would like to personally thank each of you for allowing us to serve your archery needs, and for recommending Lancaster Archery to other archers. We take our responsibilities to you seriously, and we look forward to helping you achieve your shooting or archery business goals. Each of us shares your love of archery, whether you enjoy Olympic Recurve, NFAA Field or Target Archery,S3DA, NASP, Traditional, 3D Shoots, Bowhunting or shooting for recreation. Our staff shoots and works with every form of archery with a deep passion, commitment and love for the sport. Call on us anytime for thoughtful answers to any archery-related question.

We Are Archery TechXPerts™

Our TechXPerts™ (Technical Experts), are ready to exceed your expectations of what an archery distributor should do for you! With over 500 years of combined archery experience, our staff will gladly answer your most technical or basic questions, giving you peace of mind as we assist you in choosing the best archery equipment available for your unique needs. When placing orders, please use our item numbers along with a complete item description including color, size, RH/LH, etc. Also notice the prefix symbol by the item name: a "+" means we normally stock this item. An "o" means this item is available, but not stocked and it will be ordered or drop shipped for you within one business day of when your order is placed with us. Rest assured that your business is appreciated by our staff of knowledgeable fellow archers. We know and use the items we sell, so you can trust that we will make sure your purchases are right for your type of shooting or archery business. We stand behind our recommendations, so please contact us if you are unhappy with an item that we suggested for you, and we will gladly exchange it to guarantee your satisfaction.

Did you ever wish you had a trusted Archery Technical Expert as your personal resource for answers when you needed it? YOU DO NOW! Just call, e-mail, or jump online to chat live with one of our Archery TechXPerts for accurate information and opinions based on years of technical archery experience.

Reputation Trusted Worldwide

Our trusted reputation for professional, fast, and courteous service is known worldwide. We evaluate, select, sell, and service only the finest quality archery products. Lancaster Archery Supply specializes in providing you with the newest innovations in Target and 3D Archery and now we've focused our expertise on Barebow or Traditional Archery gear as we are the "Recurve Experts" in Target Archery and in Barebow or Traditional Archery too.

We Continue to Expand to Meet Your Needs

We've had tremendous growth and success as a result of increased online traffic to lancasterarchery.com, lancasterarchery.com/blog, Facebook, YouTube, Instagram and Twitter. Physical traffic has more than tripled in recent years to our Retail Pro Shop and Archery Academy in Lancaster, PA. Our mission is to lead the growth of the sport by meeting the archery-related needs of our customers. Our new website and expansion into our new 85,000 sq.ft. Distribution Center & Offices in nearby Leola, Pa., have greatly expanded our commitment to providing quality archery equipment, service and technical support to businesses, organizations and individuals as a leading worldwide archery distributor. This year we've expanded the event schedule of our redesigned show trailers. The 40-foot LAS Express trailers will be supporting major archery events with repairs, equipment sales and TechXPertise™. We maintain our leadership through integrity, technical expertise, and a continuing focus on excellence in service to our customers. Lancaster Archery and our staff promote archery with a passion in an effort to facilitate the growth of the sport and our company while focusing on the highest quality service and products while continuously improving our value to customers, vendors and LAS team members.

THANK YOU for joining our growing circle of friends from all around the world. We know that you will find no finer source for all of your archery needs. Don't settle for anything less, EXCEL with us! See our www.LancasterArchery.com for the latest news, specials, calendar of events and products. Take your best shot and give us a visit, call, or e-mail. You'll shoot better for it!

Lancaster Archery TechXPerts™

Trusted Archery Technical Experts Ready to Exceed Your Expectations!

Trey Bruggeman

"Hunting and the outdoors have always been a part of my life - from hunting the mountains of PA for whitetails, to working over bird dogs for upland game, to fly-fishing for native brook trout. I was introduced to archery and bows as a young boy, but my passion for archery grew later in life out of the desire to find More opportunities to hunt and spend time in the outdoors. Today, I enjoy bowhunting for whitetails, and find the challenges of DIY public land hunting particularly rewarding. My career with Lancaster Archery Supply started simply as a part-time sales associate and bow technician in our Lancaster Pro Shop. I have since moved into the role of Customer Service Manager, and enjoy working with the broad spectrum of archers who are our customers."

Ryan Daugherty

"Like many students, once I graduated from college, I wasn't sure what career path I should take. Lancaster Archery provided me the opportunity to grow professionally, while working in an industry that I am passionate about. Each day presents new challenges and opportunities. Archery is unique in that you never know everything, and I find myself learning something new almost every day. I enjoy being able to work with and help fellow archers. I try to spend as much of my spare time as possible in the outdoors. Besides bowhunting I also enjoy hiking, photography, and spending time with my wife and daughter."

John Wert

"Lancaster Archery's first instinct is to promote archery. My role at Lancaster Archery is to promote Traditional Archery, and to help our company meet the needs of traditional archers. This is my seventh year managing TradTech Archery and it's an exciting year for us. Within the pages of this catalog you will find a new generation of TradTech limbs and risers. These new risers and limbs are designed by bowhunters and traditional archers, and are built with the most advanced bow technology in the world. TradTech bows are intended to be functional, tunable, beautiful and attainable. If you are a traditional bowhunter, tournament archer, or someone who enjoys the simple pleasure of archery in its purest form, we want to serve you with unmatched customer service and support and provide you with products you have confidence in."

Dakota Shackelford

"I remember looking in the Lancaster Archery Supply catalog and thinking, 'I wish I worked there'. I have been shooting since I was 5 years old. I remember the day I got that first bow, and how happy I was and how much I slapped my arm with the string. I started with 3D shoots, then later started to actually hunt. I mostly hunted white-tailed deer and turkeys. It wasn't until I was about 13 that I started to shoot target archery. I joined the Lancaster JOAD when I was 15. I have been shooting target ever since, and I love it. I love watching this sport grow and knowing that the future is even greater. There is nothing that makes me happier than seeing someone succeed in archery, especially when it is from my help. Give me a call. I will be More than happy to help you find a solution to your problem and assist in all of your archery needs."

Troy Walters

"Introduced at a young age to archery, it has been a part of my life - and my second nature - for as long as I can remember. My start with Lancaster Archery Supply in 2013 has grown my interest and understanding of the competitive side of the sport. Introducing youth to archery and the outdoors is what I enjoy the most about my position. Archery has connected me with some great friends and many amazing coworkers along the way. Whether it be on the LAS Express at an ASA, IBO, NFAA, NASP event, or on the phone, I look forward to connecting with you as well!"

Jim Long

"I have been hunting since 1974, when I was 12 years old. I started hunting with my father for whitetails and small game here in PA. About 10 years ago, I began hunting waterfowl so my two sons and I could spend More time together in the outdoors. I have also had the privilege of joining some the of outdoor industry's finest pro staffs like Mossy Oak brand camo and Carbon Express arrows. I began my career with Lancaster Archery in 2000 as a CSR / TechXpert and enjoy working with the customers and my fellow employees."

Josh Remley

"Since childhood I have loved everything involved with the great outdoors. My fascination began while camping, backpacking and kayaking with the Boy Scouts. I started shooting archery at the age of 10. I fell in love with everything the sport has to offer, from the thrill of shooting target archery to the heart pounding adrenalin rush of chasing monster bucks. Working at Lancaster Archery Supply has helped hone my skills and increase my knowledge of archery. Not only have I learned from vendors, suppliers and fellow employees, but from the fellow archers I speak with daily. Give me a call to answer any questions you may have, or to help you get the right equipment and advice for your next adventure."

Dan Schuller

"I began shooting Olympic recurve archery when I was 7 years old in the JOAD program at Gold n' Grain Archery. I was fortunate to have great support from my parents and everyone at McCullough's Gold n' Grain Archery. Throughout my competitive career, I was able to meet most of my goals, including: 10-time National Junior Champion, 2008 Senior Outdoor National Champion, and competing internationally on three Junior World Teams. I was a member of the U.S. Archery Team from 2005-2012, and have represented the United States in various world events. I am thankful for the opportunity I had to train at the U.S. Olympic Training Center as a resident athlete from 2006-2008. My passion for archery extends beyond the competitive field to the woods as a serious bowhunter chasing whitetails and turkeys. I enjoy being able to help people, and share all aspects of archery with others. I joined the Lancaster Archery staff in January of 2013, following graduation from Penn State University with a degree in Business Management."

Mike Notarangelo

"I started my archery career at 8 years old, when I got my first bow and began shooting with my Dad. Soon after, I started shooting and competing in a local JOAD program. Since those early years, archery has taken me all over the U.S., with many shoots, podiums, and top-10 finishes in FITA, NFAA, and 3D disciplines. Once I turned 12, I took up bowhunting, which completed my archery obsession. I have hunted and been successful in many of our neighboring states, mainly on public land. I have learned a lot so far with my experiences in the industry. Running our trailers out on the road allows me to meet many of our customers face to face, and gives me a unique view on learning new products and different ways of assisting our customers in reaching the highest level they can."

Brent King

"I began shooting a bow when I was 12 years old. I fell in love with bowhunting four years later, when I shot my first deer, and I've been hooked ever since.

In 2013, I came to work at Lancaster Archery Supply, and I soon discovered 3D archery. It's the next best thing to bowhunting!

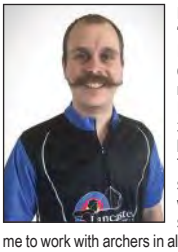
Lancaster Archery Supply gave me the opportunity to pursue the 3D game, as well as a platform to assist archers of all ages as they chase down their own archery dreams. I enjoy helping people set up their archery equipment, whether it's in person at the Pro Shop, or on the phone, in my current role as a Customer Service Representative."

Dalton Renn

"What first drew me to this great sport was my Dad and his love for the outdoors and for archery hunting. When I was still a little guy, I knew that I was going to be just like him! an immediate love for this great sport was instilled in me. I spend every free chance I can get in the woods chasing whitetails in the Northeast with my bow. While my true love is archery hunting, working here has shown me how much More archery has to offer. Today, you'll find me shooting 3D courses all summer and shooting indoor leagues all winter. I am very excited to hear from you and help in any way I can."

Sean Snyder

"I began working at Lancaster Archery Supply in 2012 as a part-time sales associate in our Pro Shop. There is no better gateway into the world of archery than through Lancaster Archery Supply, and this experience became the catalyst to my archery career. Whether it has been through work, competition, or hunting, archery has taken me all across the country, and has enabled me to meet some great people. I began shooting a compound bow as soon as I was old enough to hunt, and this later led me to 3D archery. I started shooting traditional and barebow archery after college, and this has become my primary focus ever since. Aside from archery, I enjoy fishing and woodworking."



Bryan Loveland

"Archery really started for me when I decided to take an archery class in college. It was the reason I bought my first bow. When the class ended, I kept shooting the local leagues and 3D shoots. What had started out as hobby, quickly turned into a passion. This led to working not only at the local shop but moving to Pennsylvania to work at Lancaster Archery Supply. I started in the Pro Shop, which allowed me to work with archers in all disciplines of archery. Whether it's a recurve, crossbow, or compound, I worked with them all. You can still see me shooting in the leagues, hiking the trails at a 3D or field shoot, or behind a bow press tinkering with a bow."

Deron Gue

"I began bird-dogging ringnecks when I was 6 years old. I've been gun hunting since I was 12. I Inherited my first bow – a compound - four years ago. I stopped by LAS, where Moose checked it out for me and said it was safe and would kill a deer. He was right. I shot my first archery doe during the fall of 2017, and I was hooked. I bought a Muddy Harness, learned about Prussic knots, and now I want to put in tree stands everywhere! I've been married to Judy for 27 years. We have a daughter, Allison, a son, Matt, and a golden retriever, Jaxboy."

PLACING ORDERS:

To shop anytime, please visit www.LancasterArchery.com or call our Archery "TechXPerts" at 1-800-829-7408 for advice or to place your order during normal business hours. We ship most orders within 24 hours and orders including MTO arrows within 3-5 business days. Domestic shipping transit time is 1-8 days depending on distance and shipping method. For e-mail or fax orders, please include your zip code, name, shipping/billing addresses, e-mail address, telephone number, and the item numbers that you would like to purchase. Write out the sizes, colors, and specifications necessary to ship exactly what you want. If you aren't sure, please ask. We will gladly answer your questions on any archery related subject. In the rare event of an out of stock item, indicate your preference to: a) place the item on backorder, b) hold the order until complete, or c) cancel backordered items(s). If backorder instructions are not specified, we will backorder the item and contact you by email or phone when it is ready to ship.

TERMS OF SALE:

All orders must be prepaid. We accept Visa, Mastercard, Discover and American Express credit cards. Orders may also be prepaid with a cashier's check, personal check, or money order. Visa, Mastercard, Discover and American Express credit cards are preferred as they are convenient and fast. We only bill your credit card when your order has been shipped unless it is a special order of a non-stocked item or drop shipment. In those cases, we may bill your credit card upon placing the order with our vendor.

RETURN AUTHORIZATIONS:

Your satisfaction is important to Lancaster Archery. If we have made an error while fulfilling your order, please call or e-mail us immediately and we will do everything possible to correct the situation. As per the return instructions posted at www.lancasterarchery.com/returns, qualified items purchased from Lancaster Archery Supply may be returned for a replacement item or refund within 15 days of delivery. All returns require a Return Authorization Number. The RA number must be printed on the outside of the return shipment. To obtain a Return Authorization Number for your order, please call us at 1-800-829-7408 or complete the Return Authorization Form at www.lancasterarchery.com/returns.

WARRANTY and INSURANCE OF DEFECTIVE ITEMS:

Defective merchandise is warranted and insured under the manufacturer's warranty and insurance policy coverage. Please contact the manufacturer directly or follow the procedure above for Return Authorizations. We will process the warranty under the guidelines of the manufacturer as quickly as possible. All merchandise is warranted by the manufacturer; not Lancaster Archery Supply. Most manufacturers require return of a defective item for evaluation for repair or replacement according to their policies and will not authorize us to immediately replace defective items. We will offer every assistance available to us; however we cannot offer a refund for defective merchandise unless authorized from the manufacturer.

MISSING OR DAMAGED ITEMS:

For UPS, Fed-Ex & most USPS shipments, we provide tracking information for you to ensure dependable service. USPS claims require at least 30 days for the package to arrive before allowing any claim to be filed. We recommend that critical orders be sent UPS or Fed-Ex whenever possible.

If your order is missing anything or is damaged, please check the contents carefully and then inspect the shipping carton. If the carton is undamaged, please contact us as soon as possible within 7 days of receipt. If you receive a damaged, crushed or torn-open package and the merchandise inside is damaged or missing in any way please keep all the packaging material and contact your local UPS, USPS or FED-EX service center for assistance in filing a claim. If your local carrier is unable to assist you then please call us at 1-800-829-7408. Please Do Not return the package to us until you have contacted UPS, USPS or FED-EX and received instructions on how to proceed. You may lose your right to file a claim. For information on filing a claim, please visit UPS at www.ups.com, USPS at usps.com or FED-EX at fedex.com.

INTERNATIONAL PAYMENTS:

All international orders will be ProForma invoice, prepaid by international money order or bank check drawn on a U.S. bank in U.S. dollars, wire fund transfer (TT), or bank credit card. Wire fund transfers will have a $20 bank fee added to your invoice total. E-mail, fax or call for payment and shipping arrangements. We can ship via USPS, EMS International Express Mail Service, USPS International Priority Mail, USPS International First Class Mail (</= 4 lb.), FED-EX International Priority or Economy, or another international carrier of your choice such as UPS Expedited or Express.

INTERNATIONAL SHIPMENTS:

We recommend Fed-Ex service for critical items or orders exceeding $500. Orders sent via USPS EMS and Priority International have an insurance limit of $500 and First Class mail has no insurance available. If a carrier is not specified, the best shipping method based on costs, service and value will be used. Taxes, duties and brokerage fees are not included in the shipping charges and are payable by customer upon delivery. (Typical Shipping costs for a $150 Order via USPS: Canada/$17.95; Many other Countries $34.95)

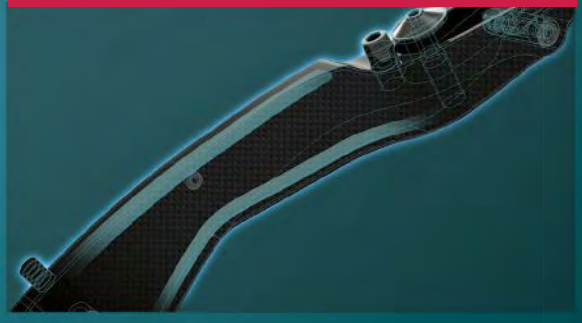
Ergonomic grip

Half composite, half pure carbon material.



Easy and convenient center shot adjustment system

TERRIFIC REDUCTION OF SHOCKS AND VIBRATIONS

Shock and vibration at the moment of shooting affect unnecessary movement and shooting feeling directly. More shooting shock makes more unnecessary movement to make shooting unclear and vibration affects archers' shooting feeling. Minimizing unnecessary movement and vibration is one of the main elements to increase archer's scores.

TARGET ARROW SELECTION CHARTS

USING THE TARGET ARROW SELECTION CHART

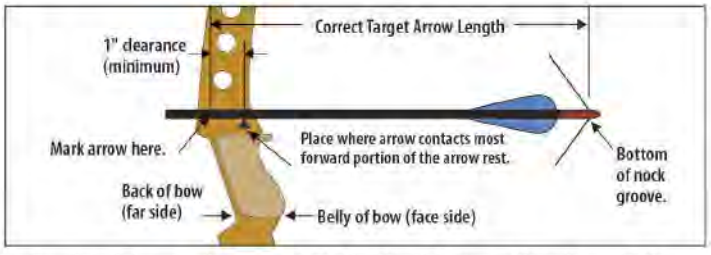
1. Once you have determined your Correct Target Arrow Length and Calculated or Actual Peak Bow Weight, you are ready to select your correct shaft size:
   1.A Compound bows. In the "Calculated Peak Bow Weight" column (left-hand side of the chart), select the column with the type of cam on your bow. Locate your Calculated Peak Bow Weight in that column.
   1.B Recurve bows and Modern Longbows. In the "Recurve Bow Weight" column (right-hand side of the chart), select the column with the bow type. Next, locate your Actual Peak Bow Weight in that column.
2. Move across that bow-weight row horizontally to the column indicating your Correct Arrow Length. Note the letter in the box where your Calculated or Actual Peak Bow Weight row and Correct Target Arrow Length column intersect. The "Shaft Size" box below the chart with the same letter contains your recommended shaft sizes. Select a shaft from the chart depending on the shaft material, shaft weight, and type of shooting you will be doing.

SELECTING THE CORRECT TARGET SHAFT SIZE

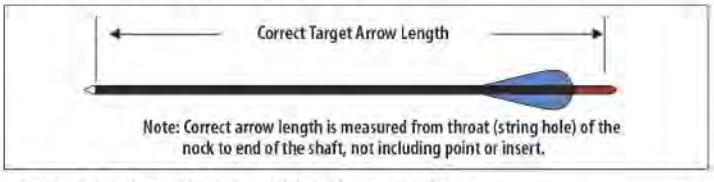
Our Target Shaft Selection Chart will help you find the perfect shaft match for your bow—quickly and easily. Advanced, interactive Spine Weight Comparison and Target Shaft Selection Charts are now available online at www.eastonarchery.com

1. Determining Correct Target Arrow Length

The Correct Arrow Length for bows (including bows with overdraws) is determined by drawing an extra-long arrow to full draw and having someone mark the arrow one inch in front of where the arrow contacts the most forward portion of the arrow rest.



Bow Draw Length. Draw length is measured at full draw from the bottom of the nock groove to the back (far side) of the bow. Actual arrow length and draw length are only the same if the end of the arrow shaft is even with the back of the bow (far side) at full draw.



2. Determining Actual Peak Bow Weight Compound Bows

Compound bows must be measured at the peak bow weight as the bow is being drawn and not while letting the bow down.

The suggested shaft sizes in the charts were determined using a **"Standard" Setup** which includes:

- Use of a release aid
- Compound bow with brace height greater than 6½"

If your setup differs from the **"Standard" Setup**, use the **Variables** (following) to make adjustments to determine the Calculated Peak Bow Weight so the correct arrow size can be selected on the chart.

Variables to the "Standard" Setup for Compound Bows

- Point weight over 100 grains–Add 3 lbs. for each 25 grains heavier than 100 grains.
- Bows with brace heights less than 6½"–Add 5 lbs.
- Finger release–Add 5 lbs.

Overdraw Compound Bows

If you are using an overdraw, make the variable calculations (if any), and then modify the Calculated Peak Bow Weight of your bow using the chart below.

Length of Overdraw	1"	2"	3"	4"	5"
For 50#–70# Actual/Calculated Peak Bow Weight, add to bow weight –	1#	3#	6#	9#	12#

3. DETERMINING ACTUAL PEAK BOW WEIGHT RECURVE AND MODERN LONGBOWS

Your local archery pro shop is the best place to determine the actual draw weight of your bow. Actual Peak Bow Weight for recurve bows and longbows should be measured at your draw length.

LOW POUNDAGE RECURVE BOW Bow Weight—lbs. Finger Release	YOUR ARROW LENGTH						
	21"	22"	23"	24"	25"	26"	27"
16–20 lbs. (7.3–9.1 kg)			Y1	Y1	Y2	Y3	Y4
20–24 lbs. (9.1–10.9 kg)		Y1	Y1	Y2	Y3	Y4	Y5
24–28 lbs. (10.9–12.7 kg)	Y1	Y1	Y2	Y3	Y4	Y5	Y6
28–32 lbs. (12.7–14.5 kg)	Y1	Y2	Y3	Y4	Y5	Y6	Y7
32–36 lbs. (14.5–16.3 kg)	Y2	Y3	Y4	Y5	Y6	Y7	
36–40 lbs. (16.3–18.1 kg)	Y3	Y4	Y5	Y6	Y7		

Note: If your arrow shaft is longer than inch length shown, round-up to the next longer increment.

1 Due to the barrel design of the X10, the weight is an average grains-per-inch of a 29" shaft. Shaft weight is slightly heavier in the larger diameter center and lighter toward the tapered ends. One inch of shaft cut from the point end typically weighs 6-7 grains.

2 Recommended that no More than these lengths be cut from the front of the shaft.

+ TopHat® X10® Rear End Protector

- Protective Sleeve for the Rear End of X10 Shafts to Prevent Splitting or Cracking of the Shaft Upon Impact
- Lipped Design Provides a Square Base for Pin Nock Adapters or Push Nocks
- Machined from Stainless Steel to a Wall Thickness of Approximately .01"
- Weight: Approx. 5 grains

ADJUSTING THE CHART TO YOUR BOW SET-UP

The hunting chart is based on a Bow Speed Rating of 301-340 FPS and 100 -grain points. If your set-up is different, make the following adjustment to your bow weight.

Bow Speed Ratings:	
Up to 300 FPS	subtract 5 lbs of bow weight
301-340 FPS	no adjustment
341-350 FPS	add 5 lbs of bow weight
351 FPS or higher	add 10 lbs of bow weight

Point Weights	
75 grains	subtract 3 lbs of bow weight
100 grains	no adjustment
125 grains	add 3 lbs of bow weight
150 grains	add 6 lbs of bow weight

MTO - MADE TO ORDER ARROWS

Lancaster Archery Supply's exclusive MTO Arrows Are custom made to Your specifications and needs. Choose Your vane style, length and color and complete the look with matching nocks and wraps.

Call one of our TechXPerts today to get started on Your perfect arrow build: 1-800-829-7408

All MTO custom arrow builds begin with the components that Are included with Your shaft. Please review Your shaft description on the product listing page of this catalog to determine the nocks, bushings, or inserts that Are included with an MTO. Selecting different components May increase or decrease Your order total depending on the options that You select.

Your choice of 3 vanes per shaft is included in the build price, with exceptions for Spin Wing style vanes, feathers, and requests for 4th fletch. Arrow wraps, nock collars, and points May also be added to Your build at the listed price of the chosen components. Labor charges Are always included for custom cut lengths and standard fletching installation.

Depending on the selections that You make, these additional rates May also apply to Your order:

MTO Premium Add-On **1970055** **$1.00 ea.**

Includes one or More of the following options:
3 Fletch with any Feather, Helical Fletch, 4th Fletch,
Install Crest Wraps (crest wraps sold separately)

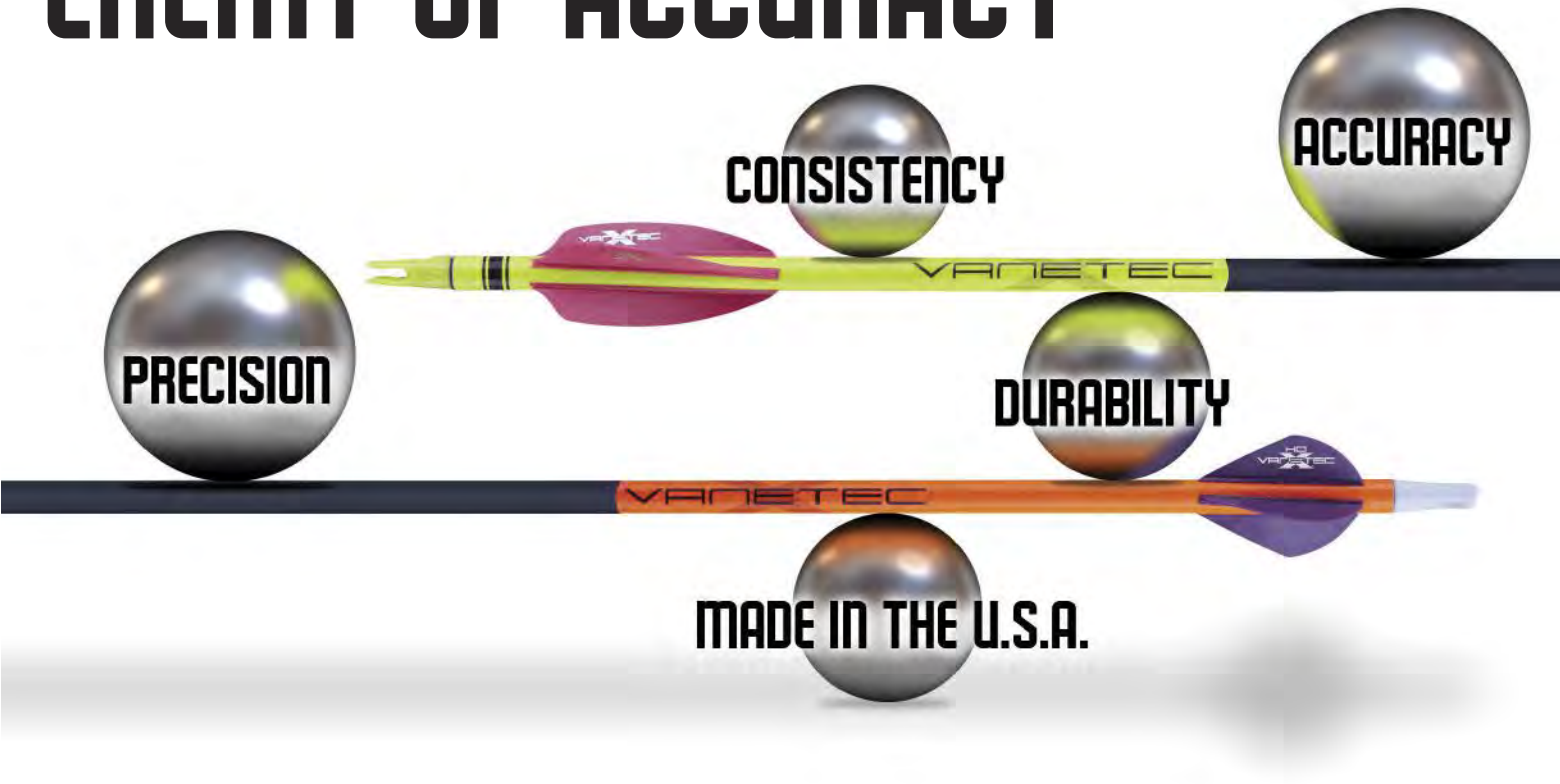
THE LACK OF PRECISION IS THE ENEMY OF ACCURACY



WHY WOULD ANY ARCHERY DEALER IGNORE IT?

Why would an archery dealer want to sell a customer precision arrow shafts, with a .001" tolerance, a precisely balanced broadhead, and then put an unbalanced rudder in the back for stabilization? Each individual vane needs to be as consistent as possible for true arrow flight.

The archers at VaneTec began developing precision techniques years ago and have worked to improve vane consistency ever since. To demonstrate, we grabbed one hundred vanes, in three of the most popular sizes produced by several competitors (along with our own of course). We recorded the length, height, thickness, and weight to determine how precise the tolerances of the actual vanes were to the advertised specifications.

Want more arrow accuracy?
The margin of error is too small to ignore precision!

SHAPES & SIZES

RAYZR

This feather is made with Whisper Quiet Technology. The shape is different from a shield shape because of the angle cut on the back of the feather and all Rayzrs are cut from the thinnest portion of the full length feather! The Rayzr will fly quieter than plastic! **Available in: 2" L/W + R/W**

PARABOLIC or ROUND BACK

Our parabolic shape is a lower profile shape providing fast accurate arrows. **Available in: 1 7/8" R/W, 2 1/2" R/W, 3" L/W + R/W, 4" L/W + R/W, 5" L/W + R/W**

SHIELD or SHIELD BACK

The shield shape provides a different profile for increased stability, forgiveness and "Traditional" looking appeal. **Available in: 2 1/4" L/W, 3" L/W + R/W, 4" L/W + R/W, 5" L/W + R/W**

MAGNUM or BANANA CUT

Magnum is a 5 ½" feather designed for arrows with larger/heavier broadheads. **Available in: 5 1/2" L/W + R/W**

BATWING

The Batwing shape just screams "Beautiful Arrows"! If you enjoy building arrows and making your equipment better than the next guys then this feather is for you. This shape is being used successfully by target archers for INCREASING arrow spin on over spined arrows.
Available in: 2" R/W, 3 1/2" R/W, 4 1/2" R/W

CUT SECTION/FULL LENGTH

Cut Section shapes are used to make Flu Flu arrows which are used for small game and aerial target shooting. The big feather is durable and makes the arrow easier to find. Our full length feathers are used to cut or burn your own favorite shape and size. They can also be used similar to a Cut Section. **Cut Section Available in: 5 1/4" L/W + R/W**
Full Length Available in: 8"-12" L/W + R/W

ACCESSORIES

G1 GLUE

Incredibly strong, weather resistant bond. Use with feathers or plastic vanes on carbon, aluminum and wood shafts; nocks and inserts. No drip formula. 1-oz. or 2-oz. bottles.

WATERPROOFING POWDER

This non toxic, odor free and weightless powder will help guide your feather fletchings in any weather!

ARROW TRACERS

Feather tracers will help you see your arrow all the way to your target. Tracers add virtually no weight and double as a wind direction aid.

NEW!

- Pro Series Sight Tapes Come in 3 Individual Pages
- Available Models: A-Slow, B-Medium Fast, C-Very Fast
- Speed Range: Very Slow (Approx. 200 fps) to Very Fast (Approx. 330 fps)
- 126 "Different" Sight Tapes Over the 3 Pages and Are Color Coded to Assist in Preventing Sight Setting Errors
- The Average Tape Difference is in 1 fps Increments
- Average Difference Between Tapes at 110 yds. is 1/2 yd.; All Tapes Range from Sub 20 - 110 yds.
- While it is Impossible to Say Exactly which Page You Fall into Due to Variances in Peep Height, Sight Distance to Eye, and Anchor Point, There Are Measurements on Each Page that Identify the Gaps for 20-60 yds. and 20-40 yds., First Number is the Slowest Tape on Each Page and the Second is the Fastest Tape on Each Page
- Each Page Also Has an Overlap of Several Tapes from the Previous Page
- Each Page Has a Cutout Ruler in .05" Increments to Assist in Measuring Your Gap on a Sight
- 100% Waterproof, when Applied Directly to the Sight
- Printed with UV Inks Directly to Waterproof Vinyl that is Self Adhesive
- Simply Find Your Gap Measurement then Match to the Tape, Cutout to Fit Your Sight, Peel and Apply
- Most Shooters Find that the Tapes Are so Close Together that They Can Use Several on Each Page

YOUR TARGET SHOULD TREMBLE NOT YOUR STABILIZER!

You're not into gimmicks, and neither are we. The Micro Hex is a wind-slicing micro-diameter stabilizer with Bee Stinger exclusive Countervail technology.

Countervail proprietary material is built right into the carbon bar – it may seem insignificant, but the data proves otherwise. Quicker damping and reduced recoil offer a smoother feel and quieter shot – without adding weight or sacrificing stiffness. Stabilization you'll appreciate when it's time to send it.

- Countervail Technology dampens quickly for less vibration

The Hole Story

Clean holes = Tight groups = High scores = Clean kills. We have been helping archers shoot clean holes for over 77 years. Here are three great products which do exactly that.

Nok Set® Pliers
Designed To Be The Best

Saunders invented the Nok Set® and nocking pliers in 1964. Our pliers come with double cushioned grips, self opening non-marring jaws. They're made so it is easy to watch alignment and its tip also opens the Nok Set®.

See page xxx and our new super wide Nok Speeds™ on page xxx.

Best-Shot™
Stowable Paper Tuner

Our new Best-Shot™ paper tuner brings professional results in a compact package. Tilts to the perfect angle on its base or tripod. Easy to stow, easy to use and a tool you will be proud to own.

You will find Best-Shot™ on page xxx

Forked Horn™
Swing Gauge Bow Square

The Forked Horn positions Nok Sets® accurately. Marked gauge swings away to crimp while square is on string. Centers perfectly on any style arrow rest. Offset allows use with kisser.

★★★★★

Everest
Exceptional bow case.
Great construction,
thoughtful layout of pockets
and protection of contents.
Jeremy V.

★★★★★

Another quality case
First I ordered the Superline case
and I was so happy with
it I ordered the Double 2 case,
the quality is outstanding for
the value. My next order will
be the Everest rolling case.
I cant say enough for the quality
and good looks of these cases.
Jerry E.V

★★★★★

Awesome Case!
My Elite E35 fits perfectly in this
case, the cam pockets are a great
addition to help secure your bow
in the same place each time proving
a great level of protection. This
case is well built and I can see it
easily lasting as long as I need it for
this bow and probably the next one!

DARK KNIGHT®
NAP is proud to present the next level in broadhead development, the Dark Knight. This hybrid-mechanical broadhead features a pivoting main blade and two mechanical bleeder blades designed for maximum penetration potential; the main blade hits hard and deflects around very thick bone sections to maintain momentum to deliver true pass-through power. Spitfire spring clip technology holds the main blade in during launch and the bleeder blades are guaranteed to open on impact no matter what your target.

#TENPOINTCROSSBOWS

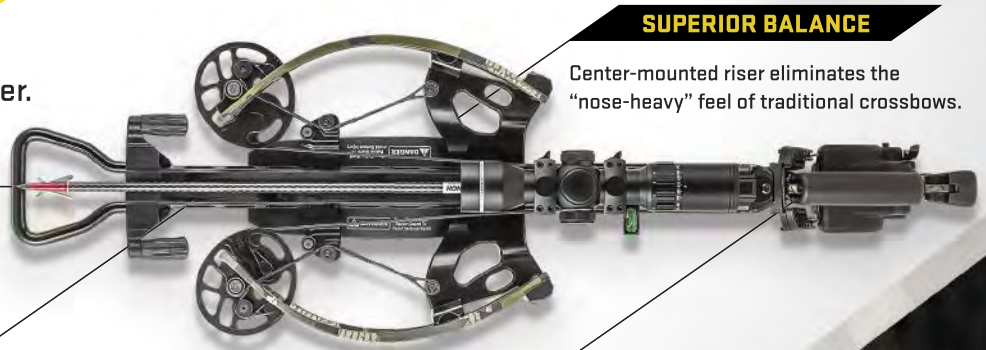
FEED YOUR NEED FOR SPEED

UP TO: 470 FPS

NEW FOR 2019

NITRO XRT™

EXPERIENCE the crossbow with unprecedented knock-down power.



SUPERIOR BALANCE

Center-mounted riser eliminates the "nose-heavy" feel of traditional crossbows.

25% FLATTER

Industry-leading speed generates flatter arrow trajectory than competing models.

3X QUIETER

Elongated power stroke generates more speed with less draw weight – resulting in a smoother shot with less vibration than competing models.

SILENT COCKING DEVICE

Silently draw your crossbow with only 9-pounds of force using the ACUdraw PRO.

TENPOINT CROSSBOW TECHNOLOGIES

SPEED: Up to 470 FPS | **POWER:** Up to 191 FP/KE | **WIDTH:** 7-Inches Axle-to-Axle | **ACCURACY:** 1 MOA

TROPHY TAKER

BUILT FOR LIFE. BACKED FOR LIFE.

In 2019, Trophy Taker continues to build on its rugged and reliable reputation with the all-new SD Lock Up limb-driven, lock-up fall-away rest. Constructed with premium grade integrated roller bearings for smooth mechanics and a secure dual-point mounting system the SD Lock Up is built to perform and built to last.

DEEPER PENETRATING THAN RAGE® & MUZZY® MECHANICAL BROADHEADS.

Brand new for 2019, the Cage Ripper™ is Ramcat's newest mechanical broad head. The Cage Ripper™ deploys faster than RAGE® and is also deeper penetrating than both RAGE® & MUZZY® mechanical broadheads.* With each and every product, Ramcat delivers everything a hunter needs to secure the shot: Accuracy. Penetration. Forgiveness. Every time.
