

2017 CATALOGUE

Airsoft Guns and Upgrade Parts
Taiwan-based Manufacturer

About Us

2001
Started producing custom parts for airsoft guns.

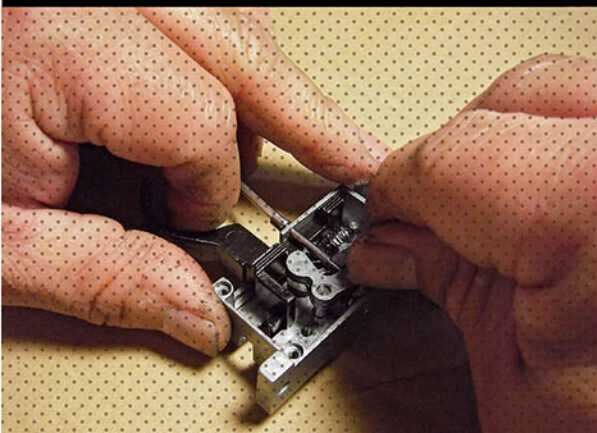

2006
Established the Modify brand for upgrade parts for airsoft guns.

2007

Launched the first Modular Gear Set in the market that shorted the time to install a gearbox from half an hour to sub-1 minute.

The right gun makes a player a sharpshooter

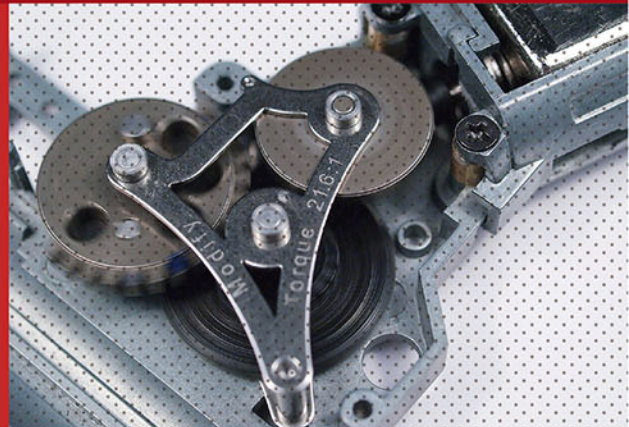

WATCH PARTS MAKER WOWS AIRSOFT GUN INDUSTRY

Some 60 years ago Mr. Sun, a tinkerer, made the first watch hand in Taiwan to be labeled a pioneer in his days. With the technology passed through the third generation, Modify uses watchmaking expertise to develop high-end airsoft guns and parts to have started its era as the top-gun in the field.

MAKER KNOWN FOR BOUTIQUE-GRADE PARTS

Obsessed with making precision parts and able to turn sketch on paper into metallic products, we're obsessed, detail-minded technicians who demand at least stable quality.

Modify adopts watchmaking know-how to design airsoft guns and upgraded parts, which have become precision must-haves among players.

WIDELY REPUTED NO. 1

Known for expertise, Modify embodies the technician to turnout airsoft guns and parts that are user-friendly with high firing accuracy to impress many players and gunsmiths. A leading Japanese gunsmith, after trying the Modify XTC-G1 AEG, could not stop praising the gun and offered to be promoter for free. And a renowned, foreign airsoft sniper, after analyzing the MOD24 bolt-action rifle, was totally awe-struck by its design to have become a loyal user.

Specialist media praise Modify's hottest airsoft guns

Overseas media: Taiwan's watch-parts maker builds realistic, accurate airsoft guns ! Modify's enterprising spirit achieves awesome success. Modular Gear Set revolutionizes installation time for AEG upgrade. MOD24 Sniper Rifle with pioneering LED magazine has steady BB trajectory for super accuracy. XTC launches 45-degree quick-throw Ambi-Safety selector for instant setting and slick operation.

With watchmaking the ultimate form of mechanical engineering, Modify crossed over from watch-parts making to airsoft guns to have become an enviable upstart in airsoft games. As a seasoned technician, Modify continues to help build Taiwan into an airsoft capital, while standing behind the made-in-Taiwan quality guarantee.

2008

Introduced the Quantum Gear Set to double AEG rate of fire from 15 RPS to 30-plus rounds with a standard motor and 8.4v battery.

2010

Successfully showcased the 3-Jaw Universal Vise at the Africa Aerospace & Defense Expo.

2015

Successfully showcased the XTC-G1 at the IWA OutdoorClassics Nuremberg.

2009

The first in Taiwan to introduce a patented recoil system Tremors for AEGs.

2013

Introduced the industry's first upgrades MOD24 airsoft sniper rifle.

OEM/ODM SERVICE

Own
Factory

Support
from Design

Experts
On-site

Low
Cost

We make parts from your 2D drawings or 3D models by CNC machining, molding, casting, plastic/metal injection, magnesium/zinc/aluminum forging, powder metallurgy and 3D printing.

A FULLY TRUSTWORTHY PARTNER

We know exactly what you demand, which is parts made right the first time, delivered on-time at reasonable price. Always keeping your interest at heart, we suggest ways to lower cost. Modify stands behind its word to always offer excellent value as the best service.

EXPERTISE WITH GUARANTEED QUALITY

Modify continues to improve its production capability to satisfy customer needs. Besides offering toy parts, watch parts, precision mechanical parts and tools, photoelectric & fiber optics part etc., we provide free advice. Able to offer samples as requested, we are backed by experienced engineers to speed new product development.

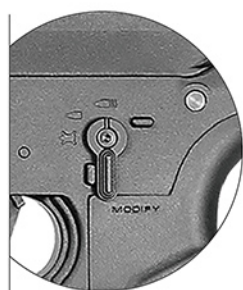

Xtreme Tactical Carbine
XTC Series
 Automatic Electric Airsoft Gun

Aerodynamic features life-like detailing beyond comparison. OE caliber with upgraded quality to dominate the field.

3-Point Fixed Ring and Double Nuts

45° Ambi-Safety Selector

Functional Folding Sights

- ⊗ Triple battery storages
- ⊗ Ergonomic Stock Design
- ⊗ 6-position Adjustable Crane Stock
- ⊗ Quick Change Spring and FPS Adjustable

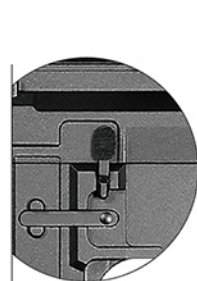

Standard 1913 Picatinny rail

- ⊗ CNC machined 14.5" Outer Barrel
- ⊗ T6065 H Grade Aluminum Rail KeyMod Handguard

CNC machined Steel Flash Suppressor

Tactical Sling Adapter

Redesigned Ergonomic Grip

Captured Lower Receiver Pin

Redesigned functional bolt catch

- ⊗ Redesigned Easy Dial Adjustment Hop Up System
- ⊗ 6.1 mm Extreme Straight Precision Inner Barrel

Enhanced Upgrade Gearbox Parts

- ⊗ CNC machined Steel Gear Set
- ⊗ Aircraft Aluminum Piston Head, Cylinder, Cylinder Head
- ⊗ 8mm Ceramic Ball Bearings
- ⊗ 7 Metal Teeth High Speed/ Torque Ultra Piston

Steel Straight Trigger

Enhanced Polymer 190rds Mid-Cap Magazine

- ⊗ Billet Style Upper and Lower Receiver
- ⊗ Front magazine serration for better grip
- ⊗ Flared magazine well for faster reloading
- ⊗ Built-in Enhanced Trigger Guard

Extreme Consistency and Accuracy

MOD24

Bolt Action Air Rifle

For those who can accept nothing less than perfection, there is no other choice. The Modify-Tech Airsoft Sniper Rifle MOD24 is built for shot-to-shot consistency and reliability of accuracy.

Upgraded Heart

Tough steel cylinder and enhanced metal internal parts for strength

Enlarged Bolt Handle and Reinforcement.

Removable 1913 Picatinny Top Rail

Raised, extended top rail for mounting sighting systems

Newly-Designed Adjustable Accurate Hop Up System

Extremely Straight 6.08mm Precision Inner Barrel

Exactly Built Outer Barrel

It fits the receiver perfectly

Illuminated Magazine for Tracer BBs with Modular LED

Enlarged Trigger Guard

Wider Textured Adjustable Steel Trigger

It's trigger pull adjustable and trigger travel adjustable

Ergonomic Pad Design

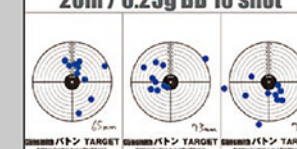

MOD24 Upgrade Parts

- Barrel Spacer for MOD24
- MOD24 Barrel Extension Adapter
- CNC machined Aluminum Pressure Plate
- Ultra Light Piston for MOD24/APS-2 Series
- Reinforced Spring Guide Stopper for MOD24
- 6.03mm Precision Inner Barrel 485 mm for MOD24 Series
- Stainless Spring Guide w/ Bearing for APS-2 Series (9mm)
- Irregular-Pitch Spring for MOD24/ APS-2 - S110+/ S150+/ S170+

20M accuracy tested in Japan

Airsoft Upgrade Parts

New Products

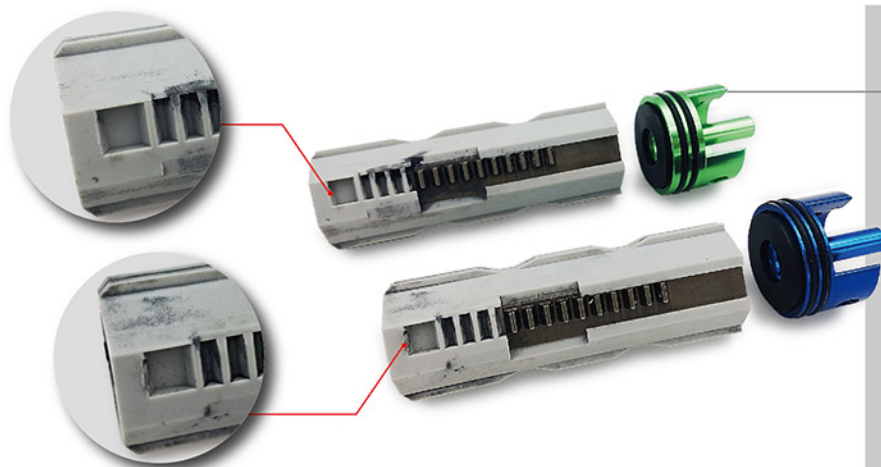

AOE cylinder Head & Piston (w/10 Metal Teeth)

The most effective upgrade for Ver.2 gearbox

- ⊗ CNC machined aluminum AOE cylinder head
- ⊗ 10-wear resisting steel teeth AOE piston
- ⊗ Lengthened cylinder head for correctly setting AOE in most AEGs

The exacting AOE cylinder head is designed to increase piston durability by correcting angle of engagement (AOE).

Shown after 6,000 shots.

The AOE Piston lasts significantly longer when mated with the AOE Cylinder Head (Hulk green), helping to make your AEG much more reliable.

The AOE Cylinder Head & Piston work independently and together to form a functioning Angle of Engagement.

The AOE Cylinder Head works with a piston whose 2nd tooth is removed.

Stainless Steel 6.03mm Precision Inner Barrel for Gas Blowback Pistol / GBB

- ☞ CNC machined 304 Stainless steel
- ☞ Extremely Straight with High Rigidity and Accuracy

66305101	74 mm	for MARUI G26/KJ G27 Gas Blowback Pistol
66305102	85 mm	for KJW G19/G23 Gas Blowback Pistol
66305103	91 mm	for Marui M&P9/ PX4 Gas Blowback Pistol
66305104	97 mm	for Marui G17/G18C/P226/Hi-Capa 4.3 Gas Blowback Pistol
66305105	100 mm	for Marui XDM/FN57 Gas Blowback Pistol
66305106	100 mm	for Marui HK45 Gas Blowback Pistol
66305107	113 mm	for Marui Hi-Capa 5.1/MEU/M1911 Gas Blowback Pistol
66305108	115 mm	for Marui M9A1 Gas Blowback Pistol
66305109	133 mm	for Marui SOCOM Mk23 Gas Blowback Pistol
66305110	136 mm	for Marui Desert Eagle .50E Gas Blowback Pistol
66305111	138 mm	for Marui Hi-Capa 5.1-6 inch Gas Blowback Pistol
66305112	146 mm	for Marui MP7A1 GBB

MPI 22T Torque Motor - Long Shaft (Neodymium Magnets)

Low-speed, high-torque Motor

- ☞ Neodymium magnets design ensures consistency, high performance
- ☞ Minimum Power Intake design extends durability
- ☞ Torque type motor designed for high tension spring
- ☞ Steel motor pinion gear

No load and rated voltage test
by 8.4V DC and 11.1V DC

8.4V	11.1V
18500 rpm	25000 rpm
<=2.4A	<=2.8A

quantum Gear Set

"Twin-Sector" design allows double-cycle two-shots per sector gear cycle.

complete Upgrade Gearbox for Ver.2 / Ver.3

High performance complete gearbox with all Modify upgrade internal parts and rear/ front wiring.

8mm Ceramic Ball Bearings

Revolutionary design for improved effectiveness and durability.

Safety Anti-Reversal Latch

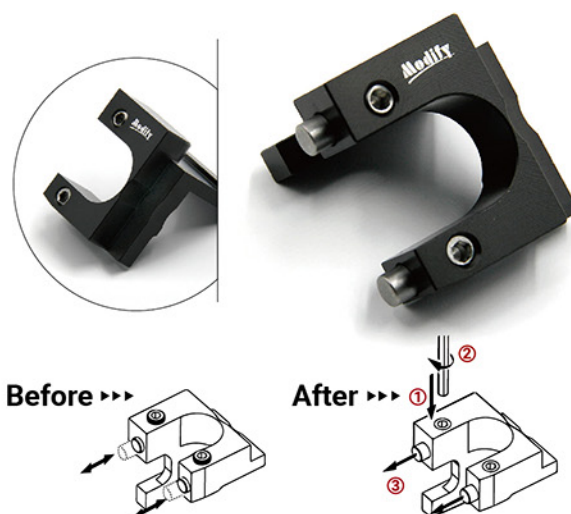

More than an Anti-Reversal Part

AEG Wellock Bracer for Ver. 2 Gearbox

Fixed-Angle Design

- ⌚ Unilateral brace-post design for effective support without loosening
- ⌚ Surface against gearbox has U-channel for enhanced stability and closer contact
- ⌚ Special external design to offer extra room for wiring to minimize interference

BB feeding problem

TokyoMarui A.E.G. Irregular-Pitch Spring

TEST REPORT

by Rookie Sun, Modify Co. © 2006

These MODIFY parts were tested on a Tokyo Marui M4A1 using the following equipment, upgrades and conditions :

BB :	TM 0.2g
Piston :	Modify Polycarbonate Piston
Piston Head :	Modify red Aluminum Piston Head w/ Bearing
Cylinder Head :	Modify v2 Stainless Cylinder Head
Nozzel :	Modify GB-08-11
Spring Guide :	Modify v2 w/ Bearing
Bush :	Modify Stainless Bush (double oil reservoir)
Battery :	Sanyo SCE 9.6v 1800mAh
Chronograph :	Shooting Chrony SPEEDER-2000
Shooting Times :	20
Average Temperature :	20°C

All springs tested were in brand new condition first and then re-tested after shooting 30,000 pcs of BBs. Your results will vary from these published results. Different upgrades will provide different results. The data contained in this chart should only be used as a reference.

Velocity (fps)

Modify	ave. Velocity (fps) (springs tested were in brand new condition)	ave. Velocity (fps) (springs tested after shooting 30000 pcs of BBs)
S100+	369.49	369.00
S110+	410.82	405.90
S120+	444.41	443.75
S130+	469.86	466.74
S140+	518.52	540.21
S150+	542.09	540.21
