Thanks to the experience and attention to product quality that distinguish the company was made a solid and secure -against theft- cabinet making the most visible surface of glass with a structural steel frame. Simple and elegant, with the four sides all-glass (19 mm.), Glass shelves and interior lighting, the new security cabinet meets the requirements of exposure, safety and aesthetics. Versatile in the fitting and finishing work can also have closed-end fund with elegant interior tissue and wire rack for guns in order to become a modern and valuable rifle rack. The safety lock cylinder with European profile also provides the option to create a series of glass cabinets with key mastered. Ideal for museums, shops and wherever there is the need to expose valuables can be adapted to the environment with various colors and finishes.

The **Sicura** company was established in 1972 as an artisan company. Today is a national leader in the production and sale of **safes and rifle rack cabinets**, in both private and professional. In the establishment of Cattolica has developed a complete production cycle, from design to production with assembly and from test to packaging. SICURA's products are distinguished by **quality, robustness and uniqueness**, as made on automated production line with advanced technology, such as **laser cutting, robotic welding, painting with epoxy powder** at high temperatures. Each model is constructed with **stainless steel** and subjected to as many as **15 different checks** before being sold. **Each product is certified with Statement of Compliance, with EN356 safety glass and EN1063 bullet proof.**

WE CAN EXECUTE CUSTOM CABINETS!
