## FOLDBACK™

**HOW MANY TIMES HAVE YOU HAD YOUR  
RELEASE HIT YOUR LADDER STAND AS  
YOU CLIMB UP IT EARLY IN THE MORNING  
DARKNESS?**

While your rattling, aren't you tired of your  
release flopping all over?

Time and time again, your release seems to get in the  
way at the wrong time -- not anymore!!! TruFire's buckle  
Foldback system is simple yet it gets the job done. It  
takes just 1 lb. of pressure to put the release in the  
stowed position and only 1 lb. of pressure to get it back  
to the shooting position.

**QUIET, QUICK & SIMPLE.**

**OUR EVOLUTION BUCKLE STRAP PROVES  
ONCE AGAIN WHY WE ARE THE LEADERS  
OF THE RELEASE INDUSTRY.  
INNOVATION, QUALITY, CRAFTSMANSHIP  
ALL ROLLED UP INTO ONE!**

*What are the two most common complaints with the buckle straps on the market today?*

**1. Difficult to put on?**

Nobody wants to fumble around in the dark, trying to get their strap on while 20 feet up in their tree.

With our patented design you will never have to fumble to get the end of your strap through the buckle because it already is through the buckle via our TrapTab. There is no need to ever have to pull the arrow head out of the buckle. It works great with or without gloves?

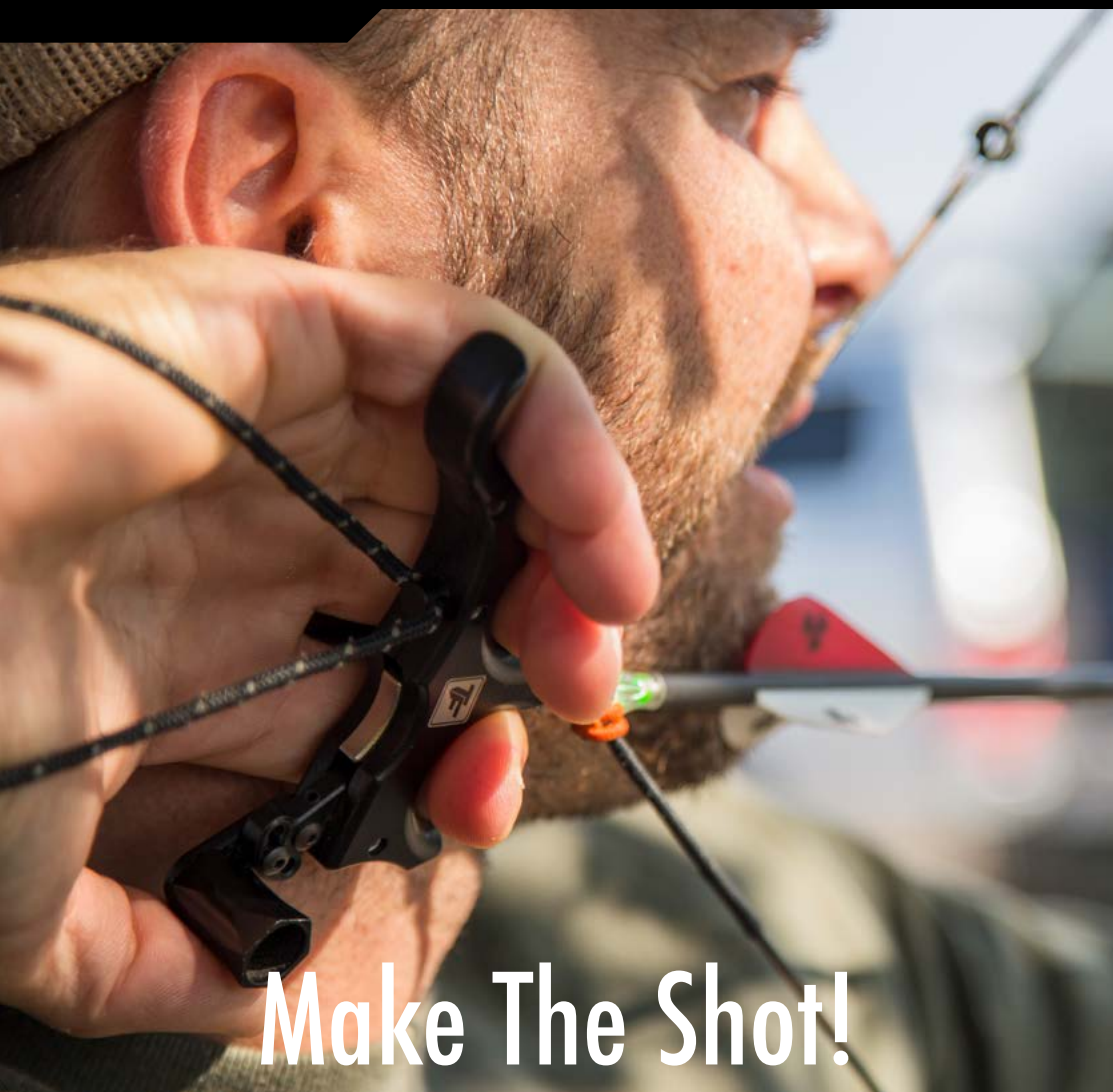

**2. Tons of stretch in the strap while drawing your bow?**

Buckle straps are supposed to promote exact strap location on your wrist every time. What good is a buckle strap that stretches while you shoot it.

Unlike other buckle straps on the market, we go the extra mile by having a piece of ballistic material layered between the leather portion of the strap and the padded material. This material keeps any stretching while drawing your bow, near zero.

# Make The Shot!

Is it that simple?

Can you make the shot no matter the conditions?

You only get one chance.

TruFire releases give you confidence and control when you need it most.

All TruFire releases have been designed to shoot accurately and with ease, allowing you to shoot consistently, expanding your potential.

TruFire quality works when you need it most.

Become one with your connection to the bow.

Raise your potential, improve your success.
