# TROPHY SERIES RELEASES

## NEW FOR 2017

The new-for-2017 Trophy Series releases are designed specifically for use with string loops. The precision-machined contoured jaws have an increased radius to accommodate the sharper string angles generated by today's short axle-to-axle bows and string loops. As with all Cobra releases, the jaws are polished which enhances accuracy and greatly reduces string loop wear.

# MAMBA RELEASES

## THE HUNTER'S FAVORITE

The most popular design used for hunting, Cobra's Mamba release is a compact, user-friendly, double-caliper release compatible with both string and loop shooting.

All Cobra releases feature calipers that move simultaneously to minimize string interference and increase accuracy. All components of the Mamba series are machined to extremely high tolerances to ensure quality and trouble free performance.

### DOUBLE CALIPERS

### AVAILABLE BUCKLE ADJUST

ROTATION

EZ Adjust

The Mamba Release's ergonomically-shaped trigger is fully adjustable. Start with the trigger's tension set on the upper end and slowly adjust it until you get a crisp, comfortable release. The forward trigger design also helps to reclaim some of the draw length lost to the string loop.

### EZ ADJUST

EZ Adjust allows the archer infinite length adjustment for a perfect finger to trigger placement which is critical to be a consistent accurate archer.

# BRAVO RELEASES

## STRIKE WITH CONFIDENCE

These are great releases for the beginning bow hunter or the archer on a budget. The double-caliper design provides a consistent release for a more accurate shot every time.

With a 360-degree rotating head, this release is perfect for right- or left-hand archers. The padded wrist strap will provide all-day comfort allowing you to concentrate on the hunt and not your release.
